for more than half his life author tim nuske thought he was crazy during a certain ten year period and beyond he could have fulfilled the diagnostic criteria for at least half of the

close to 400 mental disorders described in psychiatry's billing bible the DSM building on these experiences Nuske presents a thought provoking theory of the mind and how it relates to mental illness a widespread social concern affecting countless millions but are such experiences a real biological illness or brain disease are they caused by a chemical imbalance or genetic defect and what does the mind have to do with a mental illness disorder disease following a life changing experience and spiritual awakening Tim entered university to study psychology intent on gaining a better understanding of his own madness and the mind and to help others with what he had learned the map of the psyche the truth of mental illness is the result of four years of research and over a decade of personal experience with mental illness he had to be mental to map the mind psychologists and philosophers have been trying to understand the mind for hundreds of years Tim mapped it in under three plus a lifetime of prior experience offering an alternative to psychiatric labelling and drugging he shares what he considers to be a more accurate and effective approach to mental health care the truth is in the psyche the truth is found within

the concepts of psychological literacy and the psychologically literate citizen promise to invigorate a new global approach to psychology education they pose a basic question what attributes and capabilities should undergraduate psychology majors acquire many psychological organizations have defined psychological literacy by guidelines and lists of student learning outcomes but although psychology educators across the globe have been working towards helping students to acquire these attributes over the past 50 years educators have only recently explicitly delineated attributes and learning outcomes and sought to develop appropriate learning teaching and assessment strategies including whole program approaches the contributors to this volume argue that psychological literacy is the most important outcome of an undergraduate psychology education and that psychologically literate citizens use their knowledge of psychology to problem solve in ethical and socially responsible ways that directly benefit their communities in this book a rich variety of international perspectives contribute to the development of the two key concepts of psychological literacy and the psychologically literate citizen authors provide practical guidance for classroom psychology educators as well as curriculum developers

and reviewers ultimately they make the case for a paradigm shift in psychology education
