a leading mba text in international marketing with comprehensive cases

despite centuries of scholarly and popular engagement much confusion still hangs over jesus olivet discourse there is no consensus on the nature and meaning of the disciples question in matt 24 3 how is the temple s fate related to the parousia or second coming of jesus is the great tribulation past present or future will christians be raptured to heaven should you rather prefer to be left behind combining inductive and discourse grammar approaches as bases for literary structure and analysis this study is a holistic and compelling fresh interpretation of jesus eschatological discourse that provides answers to these questions the author shows that extant interpretive frameworks fail to adequately account for the biblical data moreover and unlike the available treatments the study sheds light on the discourse s structural and theological function within matthew s gospel as a whole and how it coheres with new testament teaching in general

most of the prefatory issues are extensively elaborated upon in the prolegomenon which also contains the complete references to the texts and authors discussed below nevertheless the preface would be grossly incomplete without touching on some of these issues books and scholars too many of this book s chapters e g mora s marx s d b weiner s examine and reference important earlier as well as contemporary general histories of psychiatry and specialized monographs in german french italian and spanish also in his 1968 short history of psychiatry d cussed below ackerknecht pp xi xii references important nineteenth and earlier twentieth century psychiatric histories in english french and german such citations will of course not be repeated here finally thanks to several publishers re editions of dozens of classical psychiatric texts one can consult their bibliographies as well see prolegomenon for references to these splendid series in a rough and ready sense medical history began in classical greece for example on ancient medicine while traditionally included in the hippocratic corpus this text seems more likely to have been written by a non or even anti hippocratic doctor moreover the hippocratic and other schools were hardly as secular as we now suppose on epilepsy for example does not so much declare the prevalent denotation of it as the sacred disease erroneous as it does that it is no more nor less sacred than any other disease
