often i heard during my army service spanning over 33 years the saying that generals do not retire they fade away this has got a lot of meaning in it and is certainly debatable my aim of writing this book is purely to motivate the younger generation to work hard be sincere be loyal and above all persevere to achieve their cherished goals in all humility i would like to say that i have no intention to beat my own drums or for that matter discredit any one while narrating my experience i follow the dictum that if i have nothing other than praise for anybody i refrain from saying anything ill i must confess that i came up in a hard way with the grace god almighty and the utter perseverance of my parents and also my uncle chithappa who sacrificed everything in my raising the least i could do to them was to

live up to their expectations and follow their guiding principles what they did for me to motivate me and instill in me the courage and determination to face life in all its reality i would like to share with the young readers to enable them to rise in life if even one student reader benefits by reading this book i will fully be satisfied for compiling the experiences of my life

in this first book on an additive group of growing importance the authors review the commercial additives available on the market the applications chapters provide you with a step by step description of techniques to select and incorporate these additives in various products engineers and scientists involved in polymer processing need practical information about these additives their applications and proper and safe handling until now much of this information has been difficult to obtain because of commercial secrecy in recent years the applications of fluoropolymer additives have expanded significantly with even the meaning of fluoropolymer additives expanding from relatively the narrow definition of ptfe powder fillers to a wide variety of fluoropolymer elastomers used as a processing aid for plastics processing such as extrusion injection molding and film blowing the benefits of fluoropolymer additives used in plastics are the elimination of sharkskin defects increases in process speed and output up to 20 the reduction of die build up the reduction of gels and optical defects etc in addition fluoropolymer additives are being increasingly used in inks lubricants and coatings for example in the coating industry fluoropolymer additives can increase the life cycle of exterior coatings due to their excellent weatherability and subsequently increase the time between recoats fluoropolymer additives are becoming more widely used with key applications including use as a polymer processing aid increasing speed and reducing faults and as an additive to lubricants inks and coatings this book is the only practical guide available to the selection and use of fluoropolymer additives and will help readers to optimize existing fluoropolymer applications and implement new ones fluoropolymers are known as an area where detailed information is hard to come by in this book two former dupont employees provide a wide range of industry sectors with the essential practical information and data they need to realize the full benefits of fluoropolymer additives written for practicing engineers ebnesajjad and morgan take a highly practical approach to the subject based on real world experience and case studies
