high speed turnouts a key technology for high speed railways have a great influence on
the safe and stable running of high speed trains design of high speed railway turnouts
theory and applications comprehensively introduces the technical characteristics and
requirements of high speed turnouts including design theories and methods of turnout
layout geometry wheel and rail relations track stiffness welded turnout turnout conversion
turnout components and manufacture and laying technologies of turnouts analyzing the
operational problems of china s high speed turnout in particular this book discusses the
control of structure irregularity state irregularity geometrical irregularity and dynamic
irregularity during the design manufacture laying and maintenance of turnouts at the end
of this reference book the author provides high speed turnouts management methods

maintenance standards testing and monitoring technology and maintenance technology design of high speed railway turnouts theory and applications will enable railway technicians all over the world to develop an in depth knowledge of the design manufacture laying and maintenance technology of high speed turnouts the first book in the world to focus explicitly on high speed turnouts including design construction maintenance and management of high speed turnouts expounds the theory of vehicle turnout system coupling dynamics in detail aligning this with several examples of computation and examines the results of dynamic experiments which validate the theory written by ping wang who is recognized as a leading researcher and main developer of high speed turnouts in china

the bible on anesthesia equipment returns in a new fifth edition and once again takes readers step by step through all the basic anesthesia equipment this absolute leader in the field includes comprehensive references and detailed discussions on the scientific fundamentals of anesthesia equipment its design and its optimal use this thoroughly updated edition includes new information on suction devices the magnetic resonance imaging environment temperature monitoring and control double lumen tubes emergency room airway equipment and many other topics readers will have access to an online quizbank at a companion website

the congress s unique structure represents the two dimensions of technology and medicine 13 themes on science and medical technologies intersect with five challenging main topics of medicine to create a maximum of synergy and integration of aspects on research development and application each of the congress themes was chaired by two leading experts the themes address specific topics of medicine and technology that provide multiple and excellent opportunities for exchanges

this book provides comprehensive coverage of the latest advances and trends in information technology science and engineering specifically it addresses a number of broad themes including multimodal informatics data mining agent based and multi agent systems for health and education informatics which inspire the development of intelligent information technologies the contributions cover a wide range of topics such as ai applications and innovations in health and education informatics data and knowledge management multimodal application management and web social media mining for multimodal informatics outlining promising future research directions the book is a valuable resource for students researchers and professionals and a useful reference guide for newcomers to the field this book is a compilation of the papers presented in the 4th international conference on multi modal information analytics held online on april 23 2022

this two volume set constitutes the post conference proceedings of the 6th eai international conference on advanced hybrid information processing adhip 2022 held in changsha china in september 29 30 2022 the 109 full papers presented were selected from 276 submissions and focus on theory and application of hybrid information processing technology for smarter and more effective research and application the theme of adhip 2022 was hybrid information processing in meta world the papers are named in
