corporations and the environments in which they operate are complex with changing multiple dimensions and an inherent capacity to evolve qualitatively a central premise of this study is that a postmodern reading of ethics represents an expression of and an engagement with the ethical complexities that define the business landscape in particular the deconstructive philosophy of jacques derrida offers a non trivial reading of a complex notion of ethics and thereby helps us to develop the skills necessary to critique and intervene in our practices and to develop robust strategies for living in the absence of prescriptive ethical frameworks although a central premise of this study is that substantive ethical claims can only be generated within a given context the study nevertheless presents readers with a meta position that illustrates the type of considerations that should inform ethical reflection from a complexity perspective in order to illustrate the value that this meta position holds for business ethics these considerations are explored in terms of the implications that they hold for our understanding of corporate social responsibility for the practice of

responsible management and leadership practices and for teaching business ethics

in response to a request by the health care financing administration hcfa the institute of medicine proposed a study to examine definitions of serious or complex medical conditions and related issues a seven member committee was appointed to address these issues throughout the course of this study the committee has been aware of the fact that the topic addressed by this report concerns one of the most critical issues confronting hcfa health care plans and providers and patients today the medicare choice regulations focus on the most vulnerable populations in need of medical care and other services those with serious or complex medical conditions caring for these highly vulnerable populations poses a number of challenges the committee believes however that the current state of clinical and research literature does not adequately address all of the challenges and issues relevant to the identification and care of these patients

wittgenstein s aphoristic style holds great charm but also a great danger the reader is apt to glean too much from a single fragment and too little from the fragments as a whole in my first confrontations with the philosophical investigations i was such a reader and so it turned out were most of the writers on wittgenstein s later philosophy wittgenstein s remarkable ability to bring together many facets of his thought in one fragment is fully exploited in the critical literature but hardly any attention is paid to the connection with other fragments let alone to the many hitherto unpublished manuscripts of which the philosophical investigations is the final product the result of this fragmentary and ahistorical approach to wittgenstein s later work is a host of contradictory interpretations what wittgenstein really wanted to say remains insufficiently clear opinions are also strongly divided about the value of his work some authors have been encouraged by his aphorisms and rhetorical questions to dismiss the whole cartesian tradition or to halt new movements in linguistics or psychology others exasperated reject his philosophy as anti scientific conceptual conservatism after consulting unpublished notebooks and manuscripts which wittgenstein wrote between 1929 and 1951 i became a very different reader wittgenstein turned out to be a kind of leonardo da vinci who pursued a form from which every sign of chiseling every attempt at improvement had been effaced

women and youth led agribusinesses which may also be operating as family businesses in agricultural value chains have been identified as catalysts for rural transformation given their potential for creating employment and stimulating value addition both on and off farm given that agriculture and food systems are likely to remain the key generators of employment in ghana over the coming decades and that 80 of all activities in the midstream of food value chain are undertaken by smes in africa it is very much necessary to generate the evidence to support the argument that family women and youth led agribusinesses have a key role to play in the rural transformation pathway underway in ghana

the essays in this book began simply as tools i incorporated to enhance my understanding of a course in miracles and how it blends with the literature i have read and

classes and seminars i have taken our friends and teachers unity minister patty and her husband jack morales introduced my wife pati and i to a course in miracles fifteen or so years after we had begun our spiritual journey s each of us are in pursuit of our own respective spiritual paths in our own individual ways as part of a life long search for our purpose in life trying to discover who we truly are not the persona we ve made up it just takes some of us longer to realize it we began with a small core group of people committed to their spiritual paths and it has grown steadily since as the group expanded in numbers so did the questions and people began to look to my wife and i for clarification i realized then that for myself i needed to put more effort into my understanding of a course in miracles and how it coincided with what i had studied previously beginning with my lineage the science of mind i began with notes for comparison which grew into paragraphs and eventually ended up as the essays in this book they the essays became for me a bridge between a course in miracles the science of mind the gnostic gospels and various other religions and teachings i am a perennial student and will probably be as long as i continue to breathe my search for understanding for clarification may not be insatiable but i cannot remember a time when i wasn t studying something so when my wife introduced me to metaphysics i knew that this was what i would make the topic of all my studying in the future these essays are the essence of the information i ve extracted from this process my purpose with these essays is not to provide you with what i think to be the only or right answers to any questions but as an explanation understanding or clarification that resonates for me and hopefully for you we are all unique in our individual perceptions so my perception of some subjects may not mirror yours but if one or some of my essays bring a light of understanding or help to you or assist you in seeing an old truth in a new way then we are both blessed it is my belief that all gifts are meant to be shared be it the gift our friendships our love or our knowledge because if we keep them to ourselves they are of no value to anyone if these essays provide for you a better understanding or just simplify your path in any manner please share them because as st francis said in his beautiful prayer it is in the giving that we receive photography by my good friend doug howard
