the management of ethnic diversity has become a topical and often controversial subject in recent times with much debate surrounding multiculturalism as a systematic and comprehensive response for dealing with ethnic diversity this book engages with these debates examining the tangible outcomes of multiculturalism as a policy and philosophy in a range of traditional and newer multi ethnic nations exploring the questions of whether multiculturalism can promote ethnic harmony employment equity and trust between various minority and non minority groups managing ethnic diversity also adopts a comparative perspective on the experiences of multiculturalism in various international contexts in order to examine whether lessons learned from some jurisdictions can be applied to others with an international team of experts presenting the latest research from the uk north america europe china and australasia a truly global dialogue is fostered with regard to the utility and limits of multiculturalism in local and comparative contexts as such managing ethnic diversity will appeal to social scientists interested in race and ethnicity multiculturalism and migration

with the processes of globalization we are more than ever confronted with the paradoxes inherent in modern statehood the characteristics of modern statehood are 1 securing freedom from feudal oppression or despotism 2 legislating for equality among citizens 3 focusing on inclusion to incorporate the previously excluded into the system and finally 4 of the utmost importance establishing the principle of individualism as a primary goal the social construct of ethnicity gives rise to a second paradox it develops as a material force if and when it grips the masses logically any such construct as ethnicity is exclusive to the extent on which it depends on otherness the erection of hegemonic structures to deal with these issues and also with the confrontation of shifting borders is at the core of this book

in recent years the saliency of conflicts pitting different ethnic racial and religious groups against one another has increased

dramatically the world of nation states is much more diverse than previously realized only a small number of the 185 independent countries are truly homogeneous with the end of the cold war the relative importance of ethnic conflicts as a threat to international peace and stability is far greater an international set of scholars collaborate in this volume to explore policy alternatives which can contribute towards the accommodation of cultural diversity

presenting several in depth studies this book explores how super diversity operates in every day relations and interactions in a variety of urban settings in western europe and the united states the contributors raise a broad range of questions about the nature and effects of super diversity they ask if a quantitative increase in demographic diversity makes a qualitative difference in how diversity is experienced in urban neighborhoods and what are the consequences of demographic change when people from a wide range of countries and social backgrounds live together in urban neighborhoods the question at the core of the book is to what extent and in what contexts super diversity leads to either the normalization of diversity or to added hostility towards and amongst those in different ethnic racial and religious groups in cases where there is no particular ethno racial or religious majority are certain long established groups able to continue to exert economic and political power and is this continued economic and political dominance actually often facilitated by super diversity with contributions from a number of european countries as well as the usa this book will be of interest to researchers studying contemporary migration and ethnic diversity it will also spark discussion amongst those focusing on multiculturalism in urban environments this book was originally published as a special issue of ethnic and racial studies

one of the world's leading historians of race relations George Fredrickson in his newest book probes the history of racial and ethnic diversity in the United States and other parts of the world. *Diverse Nations* explores recent interpretations of slavery and race relations in the United States and introduces comparative perspectives on Europe, South Africa, and Brazil. Notably, the book features groundbreaking work comparing ethnoracial pluralism in France and the United States in contrast to the similarities of race relations in the United States and South Africa, which both drew rigid domestic color lines. The United States and France have historically diverged greatly in their approaches to racial difference yet both are influenced by a common heritage of revolutionary republicanism, extensive immigration, and cultural pluralism. Fredrickson's rich comparisons provide stimulating new insights into the continuing impacts of slavery and beliefs about race upon our increasingly pluralistic societies.

The Canadian census lists more than one hundred ethnicities in the Canadian population, making it rather unique even among modern multi-ethnic nations. *Understanding Diversity* is a core text for use at universities and colleges across Canada. Its aim is to stimulate students to think about ethnicity and race in a more systematic, analytical manner, one that will lead to a better understanding of the important place of ethnicity in Canada and in the global society. Over the past 30 years or so, an entire body of theoretical and empirical knowledge has developed about ethnicity and ethnic and race relations in Canada. While researchers may disagree on specific issues, they have much in common and they share a basic agreement on the importance of quantitative and qualitative methods in resolving their outstanding differences. This book describes the essential features of the sub-discipline that has emerged in this area and it details what we know, don't know, and still need to know about ethnicity and ethnic and race relations in Canada.

The authors state at the beginning of this provocative new book that one of the most distinctive features of the American persona is a preoccupation and underlying concern in the United States with what is or is not American.
