this study compares text image interaction as manifested in emblem books and related forms and the modern bande dessin e or french language comic strip it moves beyond the issue of defining the emblematic genre to examine the ways in which emblems and their modern counterparts interact with the surrounding culture and what they disclose about that culture drawing largely on primary material from the biblioth que nationale de france and from glasgow university library s stirling maxwell collection of emblem literature laurence grove builds on the ideas of marshall mcluhan elizabeth eisenstein and more recently neil rhodes and jonathan sawday divided into four sections theoretics production thematics and reception text image mosaics in french culture broaches topics such as theoretical approaches past and present to text image forms the question of narrative within the scope of text image creations and the reuse of visual iconography for diametrically opposed political or religious purposes the author argues that despite the gap in time between the advent of emblems and that of comic strips the two forms are analogous in that both are the products of a parallel mentality the mindsets of the periods that popularised these forms have certain common features related to repeated social conditions rather than to the pure evolution over time grove s analysis and historical contextualisation of that mentality provide insight into our own popular culture forms not only the comic strip but also other hybrid media such as advertising and the internet his juxtaposition of emblems and the bande dessin e increases our understanding of all such combinations of picture and text

a common complaint heard in today s business office is there is paper everywhere but i cannot find the document that i m looking for it is estimated that 90 percent of all data and information currently being processed and distributed within offices and between

organizations resides on paper finding the physical space to store this paper can be a key problem to overcome this problem and others there is a need for a dramatic new approach to information processing found in business such an approach is found in this unique and useful volume essentially image processing systems in business use today s computer technology to solve paper processing and storage problems their main means of processing is performed electronically that is documents are captured initially on an electronic medium and forwarded to other users in the same mode in this manner their essential means of communicating with users is in an electronic format versus a paper one also image processing systems in business are much more flexible in meeting changing user needs especially when the data is stored on optical disk

the objective of this tutorial is to provide a working understanding of the design implementation and analysis of computer simulations preface
