who really gets ahead in a market based economy this book asks the reader a simple question is our economy a ladder or a lottery are people able to control their position on the economic spectrum by their actions some argue that in our market based economy if you play by certain rules and make certain choices you ll achieve upward mobility no matter what economic position you were born into drawing on his vast economic expertise gary a hoover explores what this social contract requires of its citizens and what it offers in return hoover shows how civil unrest is often directly related to broken society level promises exploring protest movements such as occupy wall street the tea party the arab spring and student debt forgiveness as case studies he also predicts where future protests can be expected if results promised are not results delivered this insightful and data driven book tackles challenging issues around income inequality health care and artificial intelligence and ultimately equips readers to answer these pressing questions is our social contract a ladder to higher economic standing accessible to all no matter where they start or rather a lottery in which many will buy a ticket but only a few will find success and how can we best align social promises with our lived economic realities

economics has a problem the discipline cannot distinguish the causes of human action from the consequences of human action economists deal with matters of fact not with feelings and morals they model representations of optimal agents not flesh and blood human beings in ordinary life by assuming that incentives and self interest are sufficient to explain

economic activity economic science proceeds as if the human mind does not matter but the origins of our actions ideas do indeed matter they make us human in meaningful economics bart j wilson challenges economics to directly engage human beings as we really are not as economists ideally assume wilson argues that economic science is as much about purposes and human values as it is about incentives moreover he shows how the outcomes of our decisions costs and benefits and the origins of our decisions motives and goals can be understood in an integrated way over the course of the book wilson develops a framework that connects the origins of human action to the outcomes of human action explaining human conduct with causes and effects he then shows how three basic principles of economics trade specialization and property require meaning values and purpose with a fresh perspective and a novel theoretical framework that bridges economics and ethics meaningful economics explains the roots of human conduct and its economic effects by grounding a science of economics in the moral sentiments that prompt human beings to act

military spending is continually debated in relation to its impact on economic growth proponents argue that defense spending increases economic activity by creating jobs driving technological innovation and boosting demand in industries critics cite excessive military spending diverts resources away from critical sectors like healthcare education and infrastructure potentially hindering long term economic development the actual impact often depends on a country s economic structure level of development and efficiency in allocating defense resources understanding the relationship between military spending and economic growth is crucial for policymakers aiming to strike a balance between national security and sustainable economic progress impacts of military spending on economic growth explores how regional economic growth is affected by military defense and security spending as well as the causes benefits and strategies associated with economic development it examines current issues challenges and variables for the creation of new economic models and theories to strengthen available knowledge and research this book covers topics such as human capital national security and econometric models and is a useful resource for business owners military members economists government professionals academicians researchers and political scientists

this book continues the ongoing debate about the need for alternative interdisciplinary and heterodox approaches to teaching economics at university it deals with challenges currently faced by economists pursues an interdisciplinary approach to enhance collaboration with academics from disciplines other than economics and analyses several questions and issues related to the 2007 08 financial crisis and the current covid 19 emergency the covid pandemic has shown the flaws of the current neoliberal model and the inability of mainstream economic theory to address the problems created by the pandemic the book engages with an academic audience interested in incorporating a wider range of economic approaches in their research and teaching and with undergraduate and postgraduate economics students who are trying to understand the limitations of their current economics syllabi the novelty of the book is the active involvement of undergraduate and postgraduate students who contribute to this volume with three chapters the book will be of interest to a wide range of researchers students and teachers interested in interdisciplinary and heterodox economics
