the aim is to provide a comprehensive reference work on new zealand building costs

and other related information for those involved in the various disciplines of the construction and property industries introduced

the aim of the construction handbook is to provide a comprehensive reference book on new zealand building costs and other related information

building education and research explores this new active area of research in a series of papers by internationally acclaimed experts presented at the cib w89 international conference on building education and research held in july 1998 at the Queensland University of Technology in Brisbane Australia sponsored in collaboration jointly by the Queensland University of Technology the Conseil International du Bâtiment CIB and the Australian Institute of Building AIB the conference was organised around the theme building research and education beyond 2000 and looks at the factors that are changing the requirements of building education and research economic and technological concerns environmental concerns government policies industries demands re evaluation of community expectations

2nd edition 1st edition reprinted with a new preface

achieving a sustainable building is not just a matter of design and construction what happens once the building is occupied is absolutely critical this book shows how the choices designers developers and building users make impact on sustainability over the life span of the building the authors show how a holistic approach considering costs energy use environmental impact global warming potential as well as items which are usually disregarded such as finishes furniture and appliances is needed to achieve best practice

masonry walls constitute the interface between the building's interior and the outdoor environment masonry walls are traditionally composed of fired clay bricks solid or perforated or blocks concrete or earth based but in the past and even in the present they were often associated as needing an extra special thermal and acoustical insulation layer however over more recent years investigations on thermal and acoustical features has led to the development of new improved bricks and blocks that no longer need these insulation layers traditional masonry units fired clay bricks concrete or earth based blocks that do not offer improved performance in terms of thermal and acoustical insulation are a symbol of a low technology past that are far removed from the demands of sustainable construction this book provides an up to date state of the art review on the eco efficiency of masonry units particular emphasis is placed on the design properties performance durability and life cycle of these materials since masonry units are also an excellent way to reuse bulk industrial waste the book will be important in the context of the revised waste framework directive 2008/98/EC which states that the minimum reuse and recycling targets for construction and

demolition waste cdw should be at least 70 by 2020 on the 9th of march 2011 the european union approved the regulation eu 305 2011 known as the construction products regulation cpr and it will be enforced after the 1st of july 2013 the future commercialization of construction materials in europe makes their environmental assessment mandatory meaning that more information related to the environmental performance of building materials is much needed provides an authoritative guide to the eco efficiency of masonry units examines the reuse of waste materials covers a range of materials including clay cement earth and pumice
