modern practice in stress and vibration analysis documents the proceedings of the conference on modern
 practice in stress and vibration analysis organized by the stress analysis group of the institute of physics at the
 university of liverpool 3 5 april 1989 the group has been known in the uk for its contribution in providing
 meetings with an emphasis on application covering topics which range widely to include modern numerical
 techniques and advanced experimentation the volume contains 34 papers presented by researchers at the
 conference covering a wide range of topics such as the application of the sensitivity analysis method to
 structural dynamics passive and active vibration control for use in vibration suppression in spacecraft analysis of
 an ultrasonically excited thick cylinder and the prediction of vibrational power transmission through a system of
 jointed beams carrying longitudinal and flexural waves it is hoped that the contributions published in this book
 will be of value to the broad community of practitioners in stress and vibration analysis whom the stress
