an old a suite of teaching materials is available for download including tips and templates to help establish a new course of study

ebook introduction to financial accounting 9e

this book introduces corporate financial management based on the basic capital budgeting framework and the time value of money it focuses on theoretical formulations and correct application of financial techniques that will help improve managerial and financial decisions based on fundamental principles of accounting and finance like time value of money and after tax it introduces readers to real world constraints and complexities in the two fields written in a simple and accessible manner it can be read by students of finance and accounting courses business professionals and general public alike

now in its sixth edition this successful text introduces the basic principles and underlying concepts of accounting and finance it adopts a practical non technical approach making it the ideal text for students from non accounting disciplines the text is written from a user perspective demonstrating ways in which accounting statements and financial information can be used to improve the quality of decision making

this book discusses recent developments relating to ethical and sustainable issues in accounting finance accounting is often seen as a technical discipline that records classifies and reports financial transactions however since the financial information produced concerns all interest groups both within and outside the enterprise accounting also has social characteristics and involves multi faceted duties and responsibilities as such in addition to basic principles and accepted rules and standards in the field this book focuses on the ethical aspects and fundamentals of this profession that accountants should also take into consideration as this is the

only way to build and preserve society's confidence in accounting and increase its social credibility

based on a study covering a one year financial reporting cycle at a commercial subsidiary of a well known scientific research organization inside accounting examines how accountants and non accounting managers construct their company's earnings addressing issues in both internal management accounting such as budgeting performance evaluation and control as well as external financial accounting such as book keeping monthly year end accounts and auditing david leung focuses on how people classify transactions make professional judgments and use computer software for accounting and prepare for and facilitate the auditing process he also looks at accountancy training and the impact of people's affiliations to the accounting profession or other professions on their accounting and on their perceptions of financial statements other contingent or contextual factors that influence the choice of accounting method such as time pressure reward structures management authority and institutions are also considered david leung's research employs an innovative blend of theory and practice that redresses the imbalance between ethnographic studies of financial accounting and management accounting and helps close the gap between the academic curriculum and the experiences of practitioners his research leads the author to conclude that no act of accounting classification is ever indefeasibly correct that the accounting community's institutions and authority are central to the accounting process and to the truth and fairness of accounting numbers that accounting training involves extensive use of learning by doing and that both accountants and non accounting managers have goals and interests that often result in no better than good enough accounting this book will appeal to accounting and finance professionals and academics in finance as well as to sociologists and academic researchers interested in research methods and science studies

introductory financial accounting 9e provides a unique and perfect blend of robust financial statement analysis

with early statement of cash flows coverage it is directed at those who will analyze real financial statements and make business decisions based upon that analysis real statements are used throughout starbucks statement of cash flows comes earlier in this book than most material is focused on analysis of financial statements ratios introduced early and often special portfolio section provides a road map to financial statement analysis and special section in end of chapter problems focuses on analyzing financial statements using starbucks financial statements features strong coverage of statement of cash flows ch 5 an essential financial statement one of growing importance and should be regarded as a basic statement for financial accountants
