representing one of the most visionary concepts about  
occupational therapy practice and education available today  
occupational science the foundation for new models of practice  
introduces the notion of a basic science of occupation  
specifically this provocative volume proposes that the  
profession of occupational therapy in collaboration with other  
relevant scientific disciplines develop a science of occupation  
that would provide a foundation for occupational therapy  
practice the development of an occupational science is desirable  
since occupation and its meaning for and application to human  
life are unique to occupational therapy and embody the  
principles upon which the profession was founded the forward  
thinking authors discuss the relevance of this potential science  
propose arguments for its acceptance and support by members of  
the profession and provide illustrations that suggest its  
application in practice certain to provoke serious discussion  
among occupational therapists this revolutionary book offers new  
potential and possibilities for the continuing growth of  
occupational therapy as a scientific discipline and as a  
profession occupational science introduces the idea of a basic  
science of occupation which studies the human as an occupational  
being demonstrates the application of occupational science to  
occupational therapy practice provides innovative models of  
occupational therapy practice to improve the capacities of  
people who have chronic disability and to prevent incapacity in  
those at risk
