now that we re moving from a product economy to a digital service economy software is becoming critical for navigating our everyday lives the quality of your service depends on how well it helps customers accomplish goals and satisfy needs service quality is not about designing capabilities but about making and keeping promises to customers to help you improve customer satisfaction and create positive brand experiences this pragmatic book introduces a transdisciplinary approach to digital service delivery designing a resilient service today requires a unified effort across front office and back office functions and technical and business perspectives you ll learn how make it a full partner in the ongoing conversations you have with your customers take a unique customer centered approach to the entire service delivery lifecycle apply this perspective across development operations qa design project management and marketing implement a specific quality assurance methodology that unifies those disciplines use the methodology to achieve true resilience not just stability

despite the fact that e books have been in existence for decades in various guises and added to library collections for several years now there has been a noticeable lack of published manuals on the subject this is doubtless owing to the rapidly evolving nature of the market

there is now a plethora of different types of digital object that may be termed e books and a bewildering number of business and access models to match moreover the pace of change shows no sign of abating but there is an increasing amount of popular interest in e books and what is needed is practical information to assist library and information professionals managing collections of e books and doing their best to inform their users right now the book is divided into five parts the production and distribution of e books planning and developing an e book collection delivering e books to library readers engaging readers with e books the future of e books virginia havergal ba hons msc med fifl is a learning centres and e resources manager for petroc a further education college in devon prior to this role she was an e learning advisor with jisc with a particular focus on learning resources kate price ba hons ma mclip is head of e strategy and resources at the university of surrey

build your own intelligent agent system intelligent agent technology is a tool of modern computer science that can be used to engineer complex computer programmes that behave rationally in dynamic and changing environments applications range from small programmes that intelligently search the buying and selling goods via electronic commerce to autonomous space probes this powerful technology is not widely used however as developing intelligent agent software requires high levels of training and skill the authors of this book have developed and tested a methodology and tools for developing intelligent agent systems with this methodology prometheus developers can start agent oriented designs and implementations easily from scratch saving valuable time and resources developing intelligent agent systems not only answers the questions what are agents and why are they useful but also the crucial question how do i design and build intelligent agent systems the book covers everything a practitioner needs to know to begin to effectively use this technology including an introduction to the notion of agents a description of the concepts involved and a software engineering methodology read on for a practical step by step introduction to designing and building intelligent agent systems a full life cycle methodology for developing intelligent agent systems covering specification analysis design and implementation of agents pdt prometheus design tool software support for the prometheus design process the example of an electronic bookstore to illustrate the design process throughout the book electronic resources including the prometheus design tool pdt can be found at cs rmit edu au agents prometheus this book is aimed at industrial software developers software engineers and at advanced undergraduate students it assumes knowledge of basic software engineering but does not require knowledge of artificial intelligence or of mathematics familiarity with java will help in reading the examples in chapter 10

amazon and walmart with more than half a trillion in revenues annually are the two largest companies in the world they have not only redefined the retail industry walmart in the 1980s 1990s and amazon since 2000 but have also been the benchmark for business best practices e g the use of it supply chain data analytics customer orientation this year it is anticipated that amazon will dethrone walmart as the world s largest company a position that walmart has occupied for more than two decades by examining these two companies and their business models in depth professor nirmalya kumar elucidates on the more general

phenomenon of incumbents competing with disruptors e g volkswagen vs tesla marriott vs airbnb as well as the move to omnichannel retail where physical stores must coexist with online retailers

this comprehensive book responds to the growing demand to study entrepreneurship as a key driver of innovation and competitive advantage challenging the existing idea that technological entrepreneurship exists predominantly in smes and as a result of market demands the author argues that a commitment to entrepreneurship remains the most effective strategy for sustaining wealth generation for both organisations and entire nations the aim of technological entrepreneurship is to provide the reader with additional knowledge and understanding of the concepts associated with the exploitation of technological entrepreneurship and to demonstrate how associated management principles are somewhat different to those utilised in market driven entrepreneurship validation of presented theoretical concepts is achieved through coverage of processes and practices utilised by real world organisations seeking to achieve maximum wealth generation with specific emphasis on how technological entrepreneurship is the source of disruptive innovation within service sector organisations and how the philosophy is causing fundamental change in the provision of healthcare
