the exhibits come to life and start stalking members of the ghostwriter team during a sleepover in the natural history museum

stories riddles puzzles rhymes and articles by well known authors for early elementary grades includes a section of original writings by readers

explore the legal sewers according to minns the system isn't working as it should the underground lawyer tells what went wrong how to fix it when we can't how to live with it minns has written what could be called foundations in practical law for non lawyers first he gives us some legal history as background then he introduces us to the underground lawyer a man or woman sometimes a layman sometimes a lawyer who wades through the legal sewers encountering a few sewer rats along the way the underground lawyer could be clarence darrow battling for the first amendment or aunt gertrude helping you with your traffic ticket after a preliminary introduction legal education minns takes us through the american legal system using real people documented cases vivid cartoons colorful language to drive points home this book is an encyclopedia of american jurisprudence revealing

trade secrets of the irs which he refers to as the american gestapo simplifying legal research depicting divorce which he labels disorganized crime offering tips on dealing with collection agents allowing us a glimpse into corporate boardrooms courtrooms judges chambers jail cells

believing that current educational policies and practices in american institutions of higher learning contribute to an incoherent disjunctive and wasteful four year experience for many undergraduates the author provides a sense of new direction to aid in the restructuring and reform of undergraduate education in america the primary question of the work is how can the years of undergraduate education empower the student with the knowledge and integrated set of skills needed for a lifetime of learning and productive work boudreau focuses on the primary responsibility of all institutions of higher learning to provide a superior undergraduate education all other functions of a university should be secondary to this commitment unfortunately this basic premise seems lost today this work argues that universities must undergo significant reform and renewal especially at the undergraduate level if they are to prepare students successfully for the future
