environmental economics has established itself as one of its field s most authoritative texts as well as one of the more challenging it distinguishes itself from other books by presupposing that readers already have an understanding of intermediate microeconomics thus this bookconcentrates only on environmental economics problems of pollution of earth air and water with an emphasis on regulation and private sector anti pollution incentives and coverage of international examples

the book includes the author s most important work on a variety of topics including the hotelling model of spatial competition as applied to resource economics jurisdictional tax competition particularly in the context of resource taxes and environmental regulation both theoretical and empirical

this unique and erudite second edition can be used at three different levels advanced undergraduate post graduate and doctoral it comprehensively covers the critical issues on the economics of climate change and climate policy features and clearly identifies the specific sections each level of reader should explore topics include the costs and benefits of adaptation and mitigation discounting uncertainty policy instruments and international agreements lectures can be combined with exercises guided reading or the building and application of an integrated assessment model the book is accompanied by a website with background material data opinion pieces and videos although primarily intended for use in the classroom anyone with an interest in climate policy can use this text as a reference

a major problem in health economics is how to give a value to changes in health this is

the first book to present a comprehensive survey of the money measures that are used in such evaluations the author defines the properties of these money measures examining them in both a certain and a risky world he evaluates available empirical approaches for the assessment of the value of health changes and considers measures such as quality adjusted life years qalys and health years equivalents hyes

this book presents a critical analysis of the resource curse doctrine and a review of the international evidence on oil and urban development to examine the role of oil on property development and rights in west africa s new oil metropolis sekondi takoradi ghana it seeks answers to the following questions in what ways did the city come into existence what changes to property rights are oil prospecting explorations and production introducing in the 21st century how do the effects vary across different social classes and spectrums to what extent are local and national institutions able to shape restrain and constrain trans national oil related accumulation and its effects on property in land property in housing residential leisure and commercial and property in labour how do these processes connect with the entire urban system in ghana this book shows how institutions of varying degrees of power interact to govern land housing and labour in the city and analyses how efficient sustainable and equitable the outcomes of these interactions are it is a comprehensive account of the tensions and contradictions in the main sectors of the urban economy society and environment in the booming oil city and will be of interest to urban economists development economists real estate economists africanists and urbanists

includes annual list of doctoral dissertations in political economy in progress in american universities and colleges and the hand book of the american economic association

over the last decade market based incentives have become the regulatory tool of choice when trying to solve difficult environmental problems evidence of their dominance can be seen in recent proposals for addressing global warming through an emissions trading scheme in the kyoto protocol and for amending the clean air act to add a new emissions trading systems for smog precursors and mercury the bush administration s clear skies program they are widely viewed as more efficient than traditional command and control regulation this collection of essays takes a critical look at this question and evaluates whether the promises of market based regulation have been fulfilled contributors put forth the ideas that few regulatory instruments are actually purely market based or purely prescriptive and that both approaches can be systematically undermined by insufficiently careful design and by failures of monitoring and enforcement all in all the essays recommend future research that no longer pits one kind of approach against the other but instead examines their interaction and compatibility this book should appeal to academics in environmental economics and law along with policymakers in government agencies and advocates in non governmental organizations
