This book shows that classic Chinese philosophy is as rational as western approaches dealing with the problems of logic epistemology language analysis and linguistic topics From a philosophical point of view it presents detailed analyses of rational and methodological features in Confucianism Taoist philosophy and the School of Names as well as Mohist approaches in classical Chinese philosophy especially in regard to ideas of valid knowledge The authors also provide new arguments against cultural relativism and antirational movements like religious fundamentalism that do not pay due attention to what all human beings have in common to cultural universals

This book is an introduction in the very best sense of the word It provides the beginner with an accurate sophisticated yet accessible account and offers new insights and challenging perspectives to those who have more specialized knowledge Focusing on the period in Chinese philosophy that is surely most easily approachable and perhaps is most important it ranges over of rich set of competing options It also with admirable self consciousness presents a number of daring attempts to relate those options to philosophical figures and movements from the west I recommend it very highly Lee H Yearley Walter Y Evans Wentz Professor Religious Studies Stanford University

This new edition offers expanded selections from the works of Kongzi Confucius Mengzi Mencius Zhuangzi Chuang Tzu and Xunzi Hsun Tzu Two new works the dialogues Robber Zhi and White Horse A concise general introduction brief introductions to and selective bibliographies for each work and four appendices that shed light on important figures periods texts and terms in Chinese thought

This ambitious book presents a new interpretation of Chinese thought Guided both by a philosopher's sense of mystery and by a sound philosophical theory of meaning that dual goal Hansen argues requires a unified translation theory it must provide a single coherent account of the issues that motivated both the recently untangled Chinese linguistic analysis and the familiar moral political disputes Hansen's unified approach uncovers a philosophical sophistication in Daoism that traditional accounts have overlooked

this book rewrites the story of classical chinese philosophy which has always been considered the single most creative and vibrant chapter in the history of chinese philosophy works attributed to confucius mozi mencius laozi zhuangzi xunzi han feizi and many others represent the very origins of moral and political thinking in china as testimony to their enduring stature in recent decades many chinese intellectuals and even leading politicians have turned to those classics especially confucian texts for alternative or complementary sources of moral authority and political legitimacy therefore philosophical inquiries into core normative values embedded in those classical texts are crucial to the ongoing scholarly discussion about china as china turns more culturally inward it can also contribute to the spirited contemporary debate about the nature of philosophical reasoning especially in the non western traditions this book offers a new narrative and interpretative framework about the origins of moral political philosophy that tracks how the three normative values humaneness justice and personal freedom were formulated reformulated and contested by early chinese philosophers in their effort to negotiate the relationship among three distinct domains the personal the familial and the political such efforts took place as those thinkers were reimagining a new moral political order debating its guiding norms and exploring possible sources within the context of an evolving understanding of heaven and its relationship with the humans tao jiang argues that the competing visions in that debate can be characterized as a contestation between partialist humaneness and impartialist justice as the guiding norm for the newly imagined moral political order with the confucians the mohists the laoists and the so called fajia thinkers being the major participants constituting the mainstream philosophical project during this period thinkers lined up differently along the justice humaneness spectrum with earlier ones maintaining some continuity between the two normative values or at least trying to accommodate both to some extent while later ones leaning more toward their exclusivity in the political public domain zhuangzi and the zhuangists were the outliers of the mainstream moral political debate who rejected the very parameter of humaneness versus justice in that discourse they were a lone voice advocating personal freedom but the zhuangist expressions of freedom were self restricted to the margins of the political world and the interiority of one s heartmind such a take can shed new light on how the zhuangist approach to personal freedom would profoundly impact the development of this idea in pre modern chinese political and intellectual history

goldin thus begins the book by asking the basic question what are we reading while also considering why it has been so rarely asked yet far from denigrating chinese philosophy he argues that liberating these texts from the mythic idea that they are the product of a single great mind only improves our understanding and appreciation by no means does a text require single and undisputed authorship to be meaningful nor is historicism the only legitimate interpretive stance the first chapter takes up a hallmark of chinese philosophy that demands a western reader s cognizance its preference for non deductive argumentation chinese philosophy is an art hence the title he

demonstrates more than it is a rigorous logical method then comes the core of the book eight chapters devoted to the eight philosophical texts divided into three parts philosophy of heaven philosophy of the way and two titans at the end of an age

specific chinese models for theories of knowledge were premised upon a structurally ordered external reality since natural or cosmic order is organic it naturally follows the flow of structural patterns and operates in accordance with structural principles that regulate every existence in this worldview our mind is also structured in accordance with this all embracing but open organic system the axioms of our recognition and thought are therefore not arbitrary but follow this rationally designed structure the compatibility of both the cosmic and mental structures is the basic precondition that enables humans to perceive and recognize external reality the present study shows that this paradigm of structural epistemology can already be found in the earliest chinese theories of knowledge the introduction of chinese models and their incorporation into western discourses fills an important theoretical gap in the western model of structuralism this book offers an insight into epistemological systems that arose outside the discourses of the euro american tradition it can thus help us to eliminate and supersede certain culturally conditioned prejudices as to the superiority and omnipresence of western theoretical models while demonstrating incontrovertibly that the results of western discourses are by no means the only force driving theoretical innovation at the present time
