externally promoted institutional reform even when nominally accepted by developing country governments often fails to deliver lasting change diasporans immigrants who still feel a connection to their country of origin may offer an in between advantage for institutional reform which links problem understanding with potential solutions and encompasses vision impact operational and psycho social advantages individuals with entrepreneurial characteristics can catalyzing institutional reform diasporans may have particular advantages for entrepreneurship as they live both psychologically and materially between the place of origin they left and the new destination they have embraced their entrepreneurial characteristics may be accidental cultivated through the migration and diaspora experience or innate to individuals personalities this book articulates the diaspora institutional entrepreneur in between advantage proposes a model for understanding the characteristics and motivational influences of entrepreneurs generally and how they apply to diaspora entrepreneurs in particular and presents a staged model of institutional entrepreneur actions i test these frameworks through case narratives of social institutional reform in egypt economic institutional reform in ethiopia and political institutional reform in chad in addition to identifying policy implications this book makes important theoretical contributions in three areas first it builds on existing and emerging critiques of international development assistance that articulate prescriptions related to alternative theories of change

second it fills an important gap in the literature by focusing squarely on the role of agency in institutional reform processes while still accounting for organizational systems and socio political contexts in doing so it integrates a more expansive view of entrepreneurship into extant understandings of institutional entrepreneurship and it sheds light on what happens in the frequently invoked black box of agency third it demonstrates the fallacy of many theoretical frameworks that seek to order institutional change processes into neatly definable linear stages

what does it take to build and sustain effective government institutions what have we learnt about the attempts to design and redesign public sector institutions in different countries what works and what doesn't and why this book intends to answer these questions and presents analytical tools essential in planning for institutional reform

this title was first published in 2003 this insightful work examines institutional formation and change as evidence of the major re-shaping of government internationally over the last two decades it is based on a series of case studies of institutional reform and ranges across institutions in countries including the UK China Australia and the USA each case study considers questions concerning the establishment of institutions such as what have been the objectives of institutional changes what are the principles and values on which new institutions are founded in addition to looking at broad hypotheses regarding the state and new institutions the book also draws together practical lessons regarding institutional reform thus the cases are analysed as a group to throw light on a number of issues are there patterns discernible in the formation of new political institutions what do the cases reveal about what works and what does not work in forming new institutions what predictions can be made about the relationship between values and governance structures

first published in 1985 Routledge is an imprint of Taylor Francis an informa company

this book explains why many institutional reforms in developing countries have limited

success and suggests ways to overcome these limits the author argues that reforms often fail to make governments better because they are introduced as signals to gain short term support these signals introduce unrealistic best practices that do not fit developing country contexts and are not considered relevant by implementing agents the result is a set of new forms that do not function however there are realistic solutions emerging from institutional reforms in some developing countries lessons from these experiences suggest that reform limits although challenging to adopt can be overcome by focusing change on problem solving through an incremental process that involves multiple agents

analyzes institutional bypasses a strategy to promote change and implement reforms in developing countries

this book provides evolutionary and institutional perspectives on the reform of infrastructure industries tracing the development of this process in a number of sectors and countries the contributors contend that infrastructure based industries such as telecommunications public transport water management and energy have been increasingly exposed to the dynamism of the market since becoming privatized and have therefore been stimulated into short term efficiency and long term innovation drawing on institutional economic theory backed up with case studies such as the california energy crisis the dutch gas industry oil and electricity companies in spain and the privatization of schipol airport in amsterdam the book focuses on process driving forces and actors roles to explain how new balances are established between competing institutions the degree to which the processes of institutional change are predictable and the effects of deliberate strategic interventions of governments or private actors are explored specific technical and sector aspects and their influence on institutional change in various infrastructures are also discussed

this monograph is part of a larger investigation of the political economy of institutional reform in latin america undertaken by the latin american research network it examines some hypotheses about what can be done to improve the chances for successful institutional

change it draws on the results of four case studies argentina bolivia peru and uruguay to identify the characteristics of successful reforms and provide recommendations for policymakers who seek to improve their countries institutions

in this pathbreaking work the author integrates questions of justice and stability through a model of deliberative democracy in the plural polity deliberative democracy and the plural polity provides a realistic but critical reform agenda that can animate struggles for justice in an enormously diverse world

the purpose of this paper is to provide an overview of the institutional reforms in the world bank s sector adjustment operations secals and to assess the bank s experience in implementing them the review covers institutional reforms in 55 of the 65 secals approved by the bank during fiscal 1983 1987 they include secals in agriculture trade and industry but exclude those pertaining to education and public enterprises institutional reforms stand a greater chance of succeeding when there is adequate institutional diagnosis and design including assessment of the interest groups affected and the ability of top leaders to mobilize support for reform a good case can be made for bringing the key players together in a process approach to diagnosis so that diagnosis becomes an early stage of consensus building among those who will be affected by the reforms
