during the twentieth century medicine has been radically transformed and powerfully transformative in 1900 western medicine was important to philanthropy and public health but it was marginal to the state the industrial economy and the welfare of most individuals it is now central to these aspects of life our prospects seem increasingly dependent on the progress of bio medical sciences and genetic technologies which promise to reshape future generations the editors of medicine in the twentieth century have commissioned over forty authoritative essays written by historical specialists but intended for general audiences some concentrate on the political economy of medicine and health as it changed from period to period and varied between countries others focus on understandings of the body and a third set of essays explores transformations in some of the theatres of medicine and the changing experiences of different categories of practitioners and patients

with a few notable exceptions historians have tended to ignore the role that science and medicine played in the antebellum south the fourteen essays in science and medicine in the old south help to redress that neglect by considering scientific and medical developments in the early nineteenth century south and by showing the ways in which the south's scientific and medical activities differed from those of other regions the book is divided into two sections the essays in the first section examine the broad background of science in the south between 1830 and 1860 the second section addresses medicine specifically the essays frequently counterpoint each other in the first section ronald numbers and janet numbers argue that the south's failure to keep pace with the north in scientific areas resulted from demographic factors william scarborough asserts that slavery produced a social structure that encouraged agricultural and political careers rather than scientific and industrial ones charles dew offers a strong indictment of slavery suggesting that the conservative influence of the institution severely discouraged the adoption of modern technologies other essays examine institutions of higher learning in the south southern scientific societies and the relationship

between science and theology the section on medicine in the old south also examines the ways in which the medical needs and practices of the old south were both similar to and distinct from those of other regions k david patterson argues that slavery in effect imported african diseases into the southeast and created a modified west african disease environment james h cassedy points out that land management policies determined by slavery land clearing soil exhaustion also helped created a distinctive disease environment other contributors discuss southern public health problems domestic medicine slave folk beliefs and the special medical needs of blacks science and medicine in the old south is a long overdue examination of these segments of the southern cultural milieu these essays will do much to clarify misconceptions about the time and the region moreover they suggest directions for future research
