product design is becoming increasingly challenging as product complexity increases dramatically with the advent of autonomous control and the need to achieve zero emissions companies continue to have poor product launches with significant numbers of recall campaigns and high after sales warranties it is important that potential product failures are identified and fixed during the design of a product failure modes found after the design has matured are normally easy to find with some being identified by the customer but are often difficult and expensive to fix modifying one part will often have a knock on effect on other parts causing other problems

discovering failure modes early in the design process is often difficult requiring rigorous and comprehensive analysis but once found such failure modes are usually easy and cheap to fix this book presents an approach to product design based on failure mode avoidance that utilises a series of strongly interrelated engineering tools and interpersonal skills that can be used to discover failure modes early in the design process the tools can be used across engineering disciplines despite engineering being largely a team activity it is often the case that little attention is paid to the team process after the team membership has been identified with membership normally being based on technical expertise in addition to technical expertise an effective engineering team requires individual engineers to work together efficiently good leadership is also required with the leader able to both manage change and encourage individual team members to work to the best of their ability this book interweaves technical skills team skills and team leadership in a way that reflects their real life interrelationship the book tells the fictional story of a small engineering team and its leader as they implement the skills introduced in the book and follows their experiences reflecting individual difficulties enthusiasm humour and scepticism in applying the methodologies and tools for the first time in addition the story tells of team members interactions with their management and peers within a company that having been very successful finds itself in financial difficulties it promotes constructivist learning through the reader empathising with the characters in the book these characters ask questions that are typical of those that learners will ask about the subject matter learning reinforcement is also integrated into the storyline as a natural and unobtrusive feature

introduction to floriculture provides an introduction to commercial floriculture containing information on major and minor greenhouse and field crops and includes potted plants and cut flowers the book is organized into two parts part i on cut flowers discusses the history and propagation of chrysanthemums carnations roses snapdragons orchids gladiolus and minor cut crops part ii on potted plants includes bulbous plants azaleas pot mums african violets poinsettias and easter lilies this book was written for students who have been exposed to a sufficient number of biology courses to acquaint them with many of the terms and plant processes discussed in the text it would be beneficial if they have also taken a course in greenhouse management or are taking one concurrently with their floriculture course the book can be used by commercial growers who constantly seek more information to enable them to realize maximum gain from the investments of labor time and capital they have placed in this challenging field
