brain mind and the signifying body is an exploration of a multimodal theory of cognitive science using linguistic theories first developed by

saussure and more latterly by m a k halliday paul thibault analyses how social and biological systems interact to produce meaning this fascinating study will be of interest to undergraduates and academics researching cognitive linguistics and advanced semiotics the book engages with the current dialogue between the human and life sciences to ask questions about the relationship between the physical biological aspects of a human being and the sociocultural framework in which a human being exists paul j thibault argues that we need to understand both the semiotic discursive nature of meaning making and the physical context in which this activity takes place the two are inseparable and hence the only way we can understand our subjective experience of our environment and our perceptions of our inner states of mind is by giving equal weight to both frameworks this ecosocial semiotic theory engages with linguistics semiotics activity theory biology and psychology in so doing the book produces a new way of looking at how a human being makes sense of his or her environment but also how this environment shapes such meanings

this path breaking study attempts to view both reformation discourse and renaissance fiction and by implication the elizabethan theater as constitutive of an early modern paradigm change in the authorization of discourse the profound crisis in traditional locations of authority affecting religious political and poetic courts of appeal is traced as interactive with an unprecedented proliferation of both signifying practices and communicative technologies representation itself seeks to cope with these changing uses of language and power vis vis deep divisions but also new patterns of socialization in contemporary culture and society authority now that it is less given before an utterance begins comes to constitute itself through the competence cogency and efficacy of representational practice itself even as this practice privileges and draws upon pictorial form in diverse cultural contexts this book continues to search for answers to questions of why and under what conditions in the early modern period the representation of authority could increasingly be challenged by the authority of signs initially raised in weimann s *shakespeare und die macht der mimesis* these questions are developed towards a theory and history of early modern representation that involves close encounters with a wide variety of texts from luther henry tudor edward seymour gardiner and bancroft to malory erasmus rabelais sidney nashe and cervantes robert weimann is one of the world s most eminent and intellectually formidable scholars of early modern culture and he has written a work of the utmost importance to the theory and practice of cultural and literary history and to the study of sixteenth century english and european culture in particular the book is an intellectual tour de force yet one utterly devoid of the flourishes of academic self display this work genuinely impresses without ever seeking to impress louis a montrose university of california san diego
