service innovation is a concept that for the last decade has received increased attention both among academics as well as practitioners however service innovation is a multi fragmented concept which often induces confusion the main purpose of the book is to discuss and explain what service innovation is based on contemporary research it explains service innovation from three different perspectives stimulation realization and value capture stimulation focuses on the front end of service innovation it deals with structures cultures and processes that stimulates innovation idea management will be a central part of this where the specifics with handling service ideas both internally and externally are illuminated realization deals with aspects on how to realize service innovations this includes different aspects such as specific tools to be used for developing services and also processes such as service design which aims to receive a better understanding of the customer or user as co creation is an important aspect of service innovation this will also be dealt with finally as many service innovations require behavior change internally within the organization and externally among the receiving parties this will also be covered value capture companies transitioning to become more service oriented discover the need to reconsider old business models in order to capitalize on their service offerings services are often taken for granted and included in the price this book will addresses the problem of going from free to fee in addition the book also deals with the difficulties that involve moving from a traditional product oriented logic to a more contemporary service logic

many companies have a complex process for purchasing software that is required by it projects or better by the business usually software is purchased by a centralized procurement function and is either purchased on a project by project basis or as a large periodic software contract unfortunately purchasing software products does not automatically mean that these products are exploited throughout the organization providing the maximum possible value to the business units several issues call for a structured approach that gets the most business value out of software already purchased the objectives of this approach are to create maximum awareness throughout the organization of the software purchased track software use in it projects and act if products are not used at all used improperly or insufficiently used facilitate use of software products in projects especially when software products are complex and require a lot of integration we can summarize the overall objective of this approach as ensuring that the business units in an organization obtain the maximum possible value of software products purchased which is also the scope of this ibm redbooks publication
