life is fundamentally uncertain we do not know whether it will rain whether the market will go up or down whether our unhealthy eating choices
 will have serious consequences or whether terrorists will strike our city to make matters worse we also lack a tried and true procedure for
 evaluating the likelihood of such events yet we are required to make decisions great and small that depend on these events in the absence of
 certainty or an objective procedure for estimating probabilities we must rely on our own reasoning which a great deal of research has shown to
 be less rational than we would like to believe in critical thinking varda liberman and amos tversky examine how we make judgments under
 uncertainty and explain how various biases can distort our consideration of evidence using everyday examples they detail how to examine data
