growing research shows that many children from immigrant and refugee families are not doing well in school due in part to linguistic and cultural disadvantages teaching dual language learners requires cultural sensitivity an understanding of language acquisition and intentional teaching strategies combining research and techniques this resource helps early childhood educators support dual language learners as they develop the skills necessary for school readiness and success

influence of pregnancy weight on maternal and child health workshop report summarizes a one and a half day workshop convened in may 2006 that reviewed us trends in maternal weight prior to during and after pregnancy among different populations of women examined

the emerging research findings related to the complex relationship of the biological behavioral psychological and social interactions that affect maternal and pregnancy weight on maternal and child health outcomes and discussed interventions that use this complex relationship to promote appropriate weight during pregnancy and postpartum given the unprecedented environment in the united states in which two thirds of the adult population meets the criteria for being overweight or obese the implications for women in the reproductive age period are unique in the history of the country the concerns for maternal and infant health are real the questions and answers tackled by committee members and workshop participants were not easy nevertheless having an opportunity to explore what is known examine the gaps in knowledge and explore what to do now and in the future build a pathway for further inquiry and action this report summarizes the workshop proceedings and highlights key themes that deserve further attention the participants in this workshop describe what is known about recent trends in maternal weight gain and the impact of maternal weight during pregnancy on the health of mothers and their children the workshop provided a valuable opportunity to assess trends that have occurred since the publication of an earlier study by the institute of medicine iom which included guidelines for recommended weight gain during pregnancy

children in the u s are not faring well despite major advances in public health hygiene and treatment for acute infections child health outcomes in the u s are among the bottom for developed countries as we enter the third decade of a child obesity epidemic children born in the last ten years are now likely to have a shorter lifespan than their parents coupled with an epidemic of childhood mental health issues many of them unaddressed due to stigma or lack of recognition plus the impacts of gun violence poverty and youth incarceration contribute to an overall culture that fails to prioritize the health and welfare of our youngest members of society child health a population perspective examines both the history of child health and the three dynamics that most define it the principles and dynamics between children families and communities social determinants of health and life course health development with both theoretical grounding and illustrative case studies this book provides a core framework for students in maternal and child health to better understand the issues facing children today and how to serve them best

this forward looking resource shines needed light on and offers realistic solutions for eliminating health disparities affecting one of the most vulnerable populations children its multilevel framework identifies sources of pediatric health inequities in developmental societal familial financial and service delivery contexts and sets out innovations for breaking down and addressing longstanding concerns plentiful opportunities are described for reducing gaps and promoting equity at various service platforms from locally based improvements to systemwide tech upgrades that can be used as models for revamping larger health policy and the authors long term perspective emphasizes screening wellness care early intervention and prevention strategies to support young patients in the transitions between childhood adolescence and young adulthood included in this compact idea book disparities in child health a review quality of care in pediatrics and health disparities the increasing role of quality improvement science community health worker interventions technology based interventions to address pediatric health disparities place based strategies in promoting health equity future directions for a solutions based approach with its clear delineation of issues and priorities and its workable recommendations for addressing them disparities in child health is a ready source of ideas and advocacy for practitioners and researchers in pediatrics maternal and child health and general practice family medicine

emergencies when to call your child s physician immediately what to do in case of burns bites stings poisoning choking and injuries common illnesses when it s safe to treat your child at home step by step instructions on dealing with fever infections allergies rashes earaches croup and other common ailments behavior problems proven strategies for colic sleep disturbances toilet training problems thumbsucking and the video game craze no nonsense discipline techniques for biting temper tantrums sibling fighting and school refusal health promotion from birth through adolescence essential advice on newborn baby care nutrition cholesterol testing immunizations and sex education ways of preventing spoiled children picky eaters overeating tooth decay accidents and homework problems

placing child health at the centre of health care practice and policy making these papers emphasize research and quality issues focus on teamwork in care and emphasize health promotion the reader supports a professional training course towards the award of a diploma in

child health nursing

focusing on infant skeletal remains from two urban and two rural cemeteries this study aims to examine the potential impact of urbanisation and later industrialisation on past human health in england between 850 and 1859 chapters discuss the archaeological and environmental evidence for living conditions in town and country changing attitudes towards pollution diet and hygiene skeletal evidence for disease and comparisons of the growth and mortality of children living in urban and rural conditions the four sites discussed are raunds furnells in northamptonshire st helen on the walls in york wharram percy in north yorkshire and christ church spitalfields in london

this book examines in detail the problems of mother and child health everywhere with particular emphasis on tropical and under developed countries this edition has been thoroughly revised throughout and enlarged by the addition of new chapters information and a large number of new illustrations it is not intended to be a comprehensive text but rather to present a public health philosophy which is relevant in today s world and probably always will be as long as the inequality of resources between north and south persists efforts to change health and nutrition status will not be dramatic or long lasting and malnutrition and high mortality will go unhalted prevention of infection improved child care and maternal education may be the most helpful interventions the key to health rests within the community which should harness local resources rather than depend on expensive imports or commercial alternatives e g human milk substitutes the mother is the key to the success of maternal and child health services and unless her health and status are given major importance the benefits of services on family health will not be long term there is a new chapter in this edition on mothers health problems health programmes cannot be mass produced each has to be tailor made to the local setting services have to be not only extensive and intensive but also comprehensive continuous spiced with enthusiasm and laced with common sense

using demographic and health surveys government statistics and field observations i examine trends in infant and child health in uzbekistan kazakstan and the kyrgyz republic health indicators anemia and marked low weight for age for the population under the age of

3 are examined nationally regionally and by ethnic groups findings indicate the risk of compromised child health varies by ethnicity but the effect is dramatically lessened by the introduction of household and maternal controls such as parental education residence and mother's health status findings highlight the social costs of transition illustrate the importance of maternal health across the region and assist in the identification of groups at highest risk for poor child health within individual countries
