fashion is all around us we see it we buy it we read about it but most people know little about fashion as a business veronica manlow considers the broader significance of fashion in society the creative process of fashion design and how fashion unfolds in an organizational context where design is conceived and executed to get a true insider's perspective she became an intern at fashion giant tommy hilfiger there she observed and recorded how a business's culture is built on a brand that is linked to the charisma and style of its leader fashion firms are not just in the business of selling clothing along with a variety of sidelines these companies must also sell a larger concept around which people can identify and distinguish themselves from others manlow defines the four main tasks of a fashion firm as creation of an image translation of that image into a product presentation of the product and selling the product each of these processes is interrelated and each requires the efforts of a variety of specialists who are often in distant locations manlow shows how the design and presentation of fashion is influenced by changes in society both cultural and economic information about

past sales and reception of items as well as projective research informs design manufacturing sales distribution and marketing decisions manlow offers a comprehensive view of the ways in which creative decisions are made leading up to the creation of actual styles she helps to define the contribution fashion firms make in upholding challenging or redefining the social order readers will find this a fascinating examination of an industry that is quite visible but little understood

there is no doubt that the textile industry the production of clothing fabrics thread fibre and related products plays a significant part in the global economy it also frequently operates with disregard to its environmental and social impacts the textile industry uses large quantities of water and outputs large quantities of waste as for social aspects many unskilled jobs have disappeared in regions that rely heavily on these industries another serious and still unresolved problem is the flexibility textile industry companies claim to need faced with fierce international competition they are increasingly unable to offer job security this is without even considering the informal sector work proliferating both in developing and developed countries child labour persists within this sector despite growing pressure to halt it fashion demands continuous consumption in seeking to own the latest trends consumers quickly come to regard their existing garments as inferior if not useless old items become unwanted as quickly as new ones come into demand this tendency towards disposability results in the increased use of resources and thus the accelerated accumulation of waste it is obvious to many that current fashion industry practices are in direct competition with sustainability objectives yet this is frequently overlooked as a pressing concern it is however becoming apparent that there are social and ecological consequences to the current operation of the fashion industry sustainability in the sector has been gaining attention in recent years from those who believe that it should be held accountable for the pressure it places on the individual as well as its contribution to increases in consumption and waste disposal this book

takes a wide screen approach to the topic covering among other issues sustainability and business management in textile and fashion companies value chain management use of materials sustainable production processes fashion needs and consumption disposal and innovation and design the book will be essential reading for researchers and practitioners in the global fashion business

this handbook is a compilation of comprehensive reference sources that provide state of the art findings on both theoretical and applied research on sustainable fashion supply chain management it contains three parts organized under the headings of reviews and discussions analytical research and empirical research featuring peer reviewed papers contributed by researchers from asia europe and the us this book is the first to focus on sustainable supply chain management in the fashion industry and is therefore a pioneering text on this topic in the fashion industry disposable fashion under the fast fashion concept has become a trend in this trend fashion supply chains must be highly responsive to market changes and able to produce fashion products in very small quantities to satisfy changing consumer needs as a result new styles will appear in the market within a very short time and fashion brands such as zara can reduce the whole process cycle from conceptual design to a final ready to sell well produced and packaged product on the retail sales floor within a few weeks from the supply chain s perspective the fast fashion concept helps to match supply and demand and lowers inventory moreover since many fast fashion companies e g zara h m and topshop adopt a local sourcing approach and obtain supply from local manufacturers to cut lead time the corresponding carbon footprint is much reduced thus this local sourcing scheme under fast fashion would enhance the level of environmental friendliness compared with the more traditional offshore sourcing furthermore since the fashion supply chain is notorious for generating high volumes of pollutants involving hazardous materials in the production processes and producing products by companies with low social responsibility new management principles and theories especially those that take into account consumer behaviours and preferences need to be developed to address many of these issues in order to achieve the goal of sustainable fashion supply chain management the topics covered include

reverse logistics of us carpet recycling green brand strategies in the fashion industry impacts of social media on consumers disposals of apparel fashion supply chain network competition with eco labelling reverse logistics as a sustainable supply chain practice for the fashion industry apparel manufacturers path to world class corporate social responsibility sustainable supply chain management in the slow fashion industry mass market second hand clothing retail operations in hong kong constraints and drivers of growth in the ethical fashion sector the case of france and effects of used garment collection programmes in fast fashion brands

in 2020 fashion revolution named fast fashion retailer hennes mauritz h m as the world's most transparent brand transparency refers to the seeing through of business and supply chain processes it is a method of corporate self reporting data sharing and sustainable supply chain management which has been praised for its ability to hold brands to account and to give consumers access to information about where their clothes are made although transparency does introduce a sense of accountability and openness to the fashion system it also has several limitations an overemphasis on the value of transparency promotes the fallacy that seeing something is equal to knowing it assumes that transparency is equal to sustainability and obfuscates a deeper investigation into the complexities of fashion supply chains students will be asked to reflect on h m's naming as the most transparent brand in the world and assess the role of transparency in the fashion industry

fashion is a lot more than providing an answer to primary needs it is a way of communication of distinction of proclaiming a unique taste and expressing the belonging to a group sometimes to an exclusive group currently the fashion industry is moving towards hyperspace to a multidimensional world that is springing from the integration of smart textiles and wearable technologies it is far beyond aesthetics new properties of smart textiles let designers experiment with astonishing forms and expressions there are also surprising contrasts and

challenges a new life for natural fibers sustainable fabrics and dyeing techniques rediscovered by eco fashion and artificial apparel made of wearable electronic components how is this revolution affecting the strategies of the fashion industry

when thinking about lowering or changing consumption to lower carbon footprints the obvious offenders come easily to mind petroleum and petroleum products paper and plastic even food but not clothes although the clothing industry is the second largest polluter after agriculture most consumers do not think of clothes as a source of environment
