autonomous and digital systems have changed numerous industries including healthcare finance and business however they are not exclusive to industries and have been used in homes and cities for security monitoring efficiency and more critical data is preserved within these systems creating a new challenge in data privacy protection and cybersecurity of smart and hybrid environments given that cyberthreats are becoming more human centric targeting human s vulnerabilities and manipulating their behavior it is critical to understand how these threats utilize social engineering to steal information and bypass security systems complexities and challenges for securing digital assets and infrastructure dissects the intricacies of various cybersecurity domains presenting a deep understanding of the complexities involved in securing digital assets and infrastructure it provides actionable strategies best practices and proven methodologies to fortify digital defenses and enhance cybersecurity covering topics such as human centric threats organizational culture and autonomous vehicles this book is an excellent resource for cybersecurity professionals it managers policymakers business leaders researchers scholars academicians and more

this text is written exclusively for south africans and was compiled in conjunction with some of the country s leading crime fighters

provides a record of a meeting conducted to review findings of the joint winter test program that studied aircraft operations on contaminated runways covered with snow ice or water to co ordinate research activities of various government agencies to discuss technical inputs to the 1997 98 winter test plan to examine aircraft manufacturer support guidance for the work program to discuss regulatory aspects of operating on winter contaminated runways and to identify future contamination definition work the report section contains summaries of presentations and discussions at the meeting the appendices forming the bulk of this document consist of mainly graphic material used at the presentations

the second book in the hudud trilogy lachlan macintyre has been imprisoned and the girls are recovering from their ordeal but somebody is hacking cars to kill off those that gave testimony in the court case against macintyre as the investigation takes place the girls are provided with round the clock protection but one girl is missing could her past life on the run from war torn afghanistan provide clues to where she is now

now that there s software in everything how can you make anything secure understand how to engineer dependable systems with this newly updated classic in security engineering a guide to building dependable distributed systems third edition cambridge university professor ross anderson updates his classic textbook and teaches readers how to design implement and test systems to withstand both error and attack this book became a best seller in 2001 and helped establish the discipline of security engineering by

the second edition in 2008 underground dark markets had let the bad guys specialize and scale up attacks were increasingly on users rather than on technology the book repeated its success by showing how security engineers can focus on usability now the third edition brings it up to date for 2020 as people now go online from phones more than laptops most servers are in the cloud online advertising drives the internet and social networks have taken over much human interaction many patterns of crime and abuse are the same but the methods have evolved ross anderson explores what security engineering means in 2020 including how the basic elements of cryptography protocols and access control translate to the new world of phones cloud services social media and the internet of things who the attackers are from nation states and business competitors through criminal gangs to stalkers and playground bullies what they do from phishing and carding through sim swapping and software exploits to ddos and fake news security psychology from privacy through ease of use to deception the economics of security and dependability why companies build vulnerable systems and governments look the other way how dozens of industries went online well or badly how to manage security and safety engineering in a world of agile development from reliability engineering to devsecops the third edition of security engineering ends with a grand challenge sustainable security as we build ever more software and connectivity into safety critical durable goods like cars and medical devices how do we design systems we can maintain and defend for decades or will everything in the world need monthly software upgrades and become unsafe once they stop

western investors project managers and business pioneers who wish to tap this dynamic market must master african marketing methods author jeffrey a fadiman considers africa as the west s commercial blind spot we have ignored it since the 1960s and thus have never learned how africans do business

comprehensive 352 page history with beautiful color photography and detailed illustrations includes thorough specification information for each model
