neoclassical analysis extends methods of classical calculus to reflect uncertainties that arise in computations and measurements in it ordinary structures of analysis that is functions sequences series and operators are studied by means of fuzzy concepts fuzzy limits fuzzy continuity and fuzzy derivatives for example continuous functions which are studied in the classical analysis become a part of the set of the fuzzy continuous functions studied in neoclassical analysis aiming at representation of uncertainties and imprecision and extending the scope of the classical calculus and analysis neoclassical analysis makes at the same time methods of the classical calculus more precise with respect to real life applications consequently new results are obtained extending and even completing classical theorems in addition facilities of analytical methods for various applications also become more broad and efficient

in the past twenty years or more there has been a growing interest among philosophers and theologians alike in the transcendentals and especially in the beautiful this seems fortuitous since so much of contemporary culture is fixated in many ways on beauty on what might be called a superficial or man made beauty intent on outward appearance

with little or no concern for the human person's interiority and distinctive nature the ancients and the medievals on the contrary were sensitive not only to the beauty of nature and art but also to beauty as intelligible that is to the beauty of moral harmony and of metaphysical splendor while the question of whether the beautiful is in fact a transcendental aspect of being continues to be a subject of dispute in contemporary scholarship the relationship between the beautiful and the good has been accepted since ancient times and has been attended to in recent publications none of these publications however offers a systematic treatment of this relationship by drawing from the wisdom of both ancient and medieval thought in such a way as to bring together the work of scholars in this tradition beauty and the good intends therefore to make a singular contribution by presenting a richer alternative to the contemporary cult of beauty and appearance on the one hand and to the concomitant decline of real beauty on the other hand in addition to highlighting the centrality of beauty in the aristotelian account of moral virtue where virtue is *kalon* and virtuous actions are done for the sake of *kalon* an account which is found echoed in the medieval notion of intrinsic goodness *bonum honestum* understood as intelligible or spiritual beauty this volume will provide the metaphysical and theological grounding for beauty as influenced in part by plato and neoplatonism together with a much needed account of how we know and judge beauty and how for the recognition of true good and real beauty we need to be properly disposed the integration of philosophical and theological reflection on the nature and relationship of beauty and the good on our perception and judgment of beauty and of the good as beautiful and on the motivational role of beauty in human action has as its goal to produce a coherent volume of essays
