aldo rossi 1931-97 is a key figure in 20th century architecture often described as melancholic his work was and still is influential both in architectural theory and practice this new book discusses this notion of melancholy and its role on the example of rossi drawing on rich archival sources the author investigates several aspects of the italian architect's figure and analyzes one of his landmark works the cemetery of san cataldo in modena italy he also looks at the current issues of stardom overexposure and commercialization which rossi anticipated debating them in relation to melancholy the history of melancholy as a companion to culture tells equally of affliction and an inspiration its meaning has always oscillated between medical statement and a mark of dignity subject and object the individual and the collective have surrendered to the condition's allurements while the influence of melancholy on visual arts and literature has been extensively debated its presence in architecture has been overlooked so far yet artist and poets such as albrecht durer 1471-1528 or charles baudelaire 1821-67 have related melancholy to questions of space city and modernity also architects like etienne louis boullée 1728-99 or adolf loos 1870-1933 noted sentiments of gloom or crisis in their writings likewise aldo rossi can be discussed from a similar standpoint amidst great social changes after ww ii he disputed the modernists' credos and questioned the status of his profession discarding utopian pretences his work claimed the autonomy of architecture with formal restraint these positions and his understanding of terms like fragment and memory imply melancholy his buildings drawings and writings oscillate between enthusiasm and disenchantment the cemetery of san cataldo 1971-84 is an example of the latter closely intertwined with rossi's biography its stark and monumental buildings reinterpret a typology from the past to come to terms with the representations of death and its inevitable melancholy

un autre dans l'excellente série de monographies fortement illustrées de rizzoli sur les maîtres de l'architecture contemporaine rossi né en 1931 qui a enseigné dans ce pays et écrit largement pratique à milan il fut l'un des premiers à fournir des liens historiques avec le passé abandonnant les tendances anhistoriques du modernisme les textes sont brefs mais les photographies et les plans sont complets et excellents scully a contribué une brève introduction appréciable recommandé comme un document minutieux soigné et très visuel d'architecture postmoderne jack perry brown art inst de chicago libs

the urban fact examines aldo rossis formulation of a theory of the city developed over the period of roughly ten years from architecture of the city published in 1966 to analogous city exhibited in 1976 rossis theory is not taken as an abstract argument but is seen through his work from that period a careful selection of twenty three projects is presented here at face value these projects bound by the reality of their setting but also charged with cultural and civic ambition illustrate the intricacy of an architectural project as a complex whole they also demonstrate how architecture could contribute to the changing urban context of the field hinting at an oeuvre painfully aware of its limitations and stubborn in its intentions

eye catching images of wonderful designs rarely seen truly one of the world's greatest architects alive today
