the fifth international rotifer symposium was organized by dr claudia ricci and held in the northern italian town of gargnano brescia from september 12 17 1988 through the generosity of the rector of milano university a beautiful villa on the shores of lake garda was made available to the 83 people from 20 countries who attended the symposium ten of these rotifer workers had attended the four previous meetings such symposia serve three major functions the results of which will be apparent in the papers contained in this volume first because of the heterogeneity of interests and absence of concurrent sessions the attendees are exposed to an unusually large variety of research problems approaches and modes of interpretation bridges are thus built

between one's own investigations and developments in the field as a whole second the extensive informal interactions that occur outside of the meeting room during coffee breaks dinners and excursions provide remarkable opportunities for research planning and sharing of results of work in progress third the acquaintances established at these meetings have facilitated interactions during the three year intervals between symposia the result has been that visits between laboratories acquisition of research materials from distant sources and coordination of related investigations have all been greatly enhanced a description of the week's events may serve to convey the ambience of the meeting

since the two previous rotifer symposia in Linz and Gent were highly successful it was considered important to continue the tradition every third year thus a third rotifer symposium was held in Uppsala Sweden Aug 30 Sept 4 1982 in the beginning of 1981 the first circular was mailed to the participants of the previous symposia who in turn were requested to suggest names of other scientists to be invited as a result many people expressed interest about 70 of whom finally participated in the symposium not including temporary visitors from nearby the participants represented 22 countries in Europe North America Asia and Australia as with the earlier symposia some subjects were selected in advance mainly during discussions between Henri Dumont Birger Pejler and Peter Starkweather when they met at the SIL Congress in Kyoto 1980 some broad topics such as marine rotifers were covered for the first time while other topics were continuations though more specialized of previous themes thus it is interesting to follow through the three symposium volumes recent development within the areas of feeding population dynamics and ultrastructure each prospective participant with the exception of the reviewers was invited to present one short paper alone or with collaborators which resulted in more than 40 such contributions thus the week's schedule became very crowded unfortunately leaving no time for more comprehensive workshops etc however during the evenings general discussions were held on the topics presented during the day
