nationalism and revolution in europe 1763 1848 addresses enduring historiographical problems concerning the appearance of the first national movements in europe and their role in the crises associated with the age of revolution considerable detail is supplied to the picture of enlightenment era intellectual and cultural pursuits in which the nation was featured as both an object of theoretical interest and site of practice in doing so the work provides a major corrective to depictions of the period characteristic of earlier ventures including those by authors as notable as hobsbawm gellner and anderson while

offering an advance in narrative coherence by portraying how developments in the sphere of ideas influenced the terms of political debate in France and elsewhere in the years preceding the upheavals of 1789 1815 subsequent chapters explore the composite nature of the revolutions which followed and the challenges of determining the relative capacity of the three chief sources of contemporary unrest constitutional national and social to inspire extra legal challenges to the restoration status quo

the introduction to autocracy capitalism and revolution in Russia explores the unique social economic and political dynamics that shaped the 1917 Russian revolution unlike other modern revolutions such as the French or English cases where industrialization played a secondary role the Russian revolution was heavily influenced by its emerging industrial proletariat concentrated in urban centers like Petrograd and Moscow this working class became a pivotal revolutionary force despite its relatively small size the revolution itself was multifaceted encompassing a proletarian uprising against capitalism a peasant revolt against landowners soldiers rebellions and even elements of a bourgeois revolution against autocracy the interplay of these forces created a complex revolutionary process with labor militancy at its core severe repression under tsarist autocracy stifled formal worker organizations but this repression also fueled sporadic bursts of radical action making the Russian labor movement distinctly revolutionary the book argues that the Russian revolution cannot be understood without considering the contradictions of autocratic capitalism which hindered reform and radicalized the labor movement it integrates structural and agency based perspectives showing how social movements both emerged from and shaped these contradictions the inability of the tsarist regime to allow for moderate worker organizations or adapt to modern industrial capitalism undermined its legitimacy and set the stage for the Bolshevik victory however this outcome was not inevitable but one of several possible resolutions to the crises of the old regime by analyzing the labor movement's development its interactions with the state and its role in the revolution the study highlights the unique characteristics of Russia's revolutionary experience and its broader implications for understanding social and political change this title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology this title was originally published in 1988

the military revolution and revolutions in military affairs updates two central debates in military history the one surrounding the concept of military revolution and the one on military affairs whilst advancing original research in both fields only a handful of publications consider the military revolution and the RMA in tandem this book breaks new ground conceptually and appeals to an exceptionally large and diverse readership comparative revisionist studies of the military revolution and RMA better enable us to comprehend the historical continuum and reveal the new RMA for what it is and for what it is shortly to become this book presents original contributions within the epicentre of the military revolution debate the 1500s with an emphasis on gunpowder revolution offensively and defensively the connections with the revolution in military affairs are then made explicit by scholars a practitioner and an analyst with an emphasis on airborne lethal autonomous weapons systems this is a chronologically broad and unique methodological approach to a historical debate that begs for clarification as we enter an era where killer robots will almost certainly take from humans their monopoly on violence
