as people across all nations around the world are beginning to live longer the world health organization estimates the number of

older adults will double to 1.5 billion by 2050 this presents visible increases in older adult mental health issues and it is therefore vital that we understand the cross cultural impact of social determinants of health in psychiatric illness and care in aging adults as part of the oxford cultural psychiatry series mental health in older people across cultures provides a detailed overview of the diverse factors including socioeconomic and systemic factors within and across countries that impact the process of ageing mental health and illnesses of older adults and their care this unique resource provides a necessary clinical understanding of factors on ageing and the varied roles that families and caregivers have on the ageing process with an emphasis on highlighting similarities and differences across cultures the second half of the book then focuses on specific disorders in older adults across the globe affected by these factors the nuances impacting diagnosis and treatment of these disorders as well as research and development of healthcare policy written by experts in the field from across the world this comprehensive book will be of great interest to a diversity of readers from psychiatrists to trainees general practitioners to social workers and many other mental health providers from epidemiology to economics and substance use disorders and from east asia to africa and the americas this valuable addition to the field of mental health in older adults provides a world of fascinating insight

this book is about the current status and ways ahead of geriatric psychiatry in south asia south asia is home to a large proportion of the world's elderly with improved longevity the geriatric population is increasing fast in recent years in south asian countries along with this the mental health burden of the older adults is increasing however mental health care of older adults in south asia is a neglected area little is known about the burden of mental disorders and available mental health services specific for the older adults population in south asia and other low and middle income countries it is well known that resources are fewer in this region and most of the older adults in these areas are not recognized or treated there is a urgent need to explore the services available their appropriateness and effectiveness and to reflect on the region specific economically viable solutions that can be adapted soon the book discusses how these services can be seamlessly integrated to the existing support systems besides the interventional aspects the book also explores the facilitating and impeding factors of implementing evidence based preventive efforts in these countries

despite diverse rich cultural traditions and abundant economic opportunity there has been a paucity of research on psychology in southeast asia this book aims to fill that gap with a series of well written theoretical and empirical chapters by phd psychologists in se asia along with respected international colleagues and co authors from around the globe in particular this book focuses upon critical sociocultural clinical and health issues and perspectives in psychology in southeast asia overviews help contextualize the

cultural data permitting nuanced examination of significant psychological issues in nations such as malaysia indonesia thailand singapore and more psychologists and mental health professionals with interests in asia will find this book to be a must read as will other readers seeking to deepen their cultural and international understanding

this book is about access to mental health care in south asia south asia consists of eight countries with low and middle income backgrounds the region contains a combined population of about 2 billion making up about a quarter of the global population the people of this region share common cultures beliefs and behavioral patterns regarding physical and mental health among them about 15 about 300 million have been suffering from common mental disorders however there is a persisting high treatment gap for mental illness in the region hence despite having a mental illness only a small percentage of the population is able to have access to essential mental healthcare though governments are trying to bridge the gap by improving mental health policies and programs it is still a major challenge delivering mental healthcare to all people in need due to the income category and dual disease burden of the countries there are some additional enduring challenges like poor funding and research inadequate and inequitable manpower huge out of pocket expenses poor mental health literacy income disparity and high stigma this book aims to highlight the issues related to accessing mental health services in a densely populated low and middle income setting this book is the first of its kind in comparing and contrasting the delivery status of mental health services in south asian countries

this book discusses teaching and training in psychiatry in south asia teaching and training are the pillars of learning psychiatry teaching is evolving rapidly across the globe the focus of teaching and training is gradually shifting towards developing and enhancing skills rather than just imparting knowledge about the subject recently the structure of psychiatric teaching and training has undergone change following the adoption of competency based medical education in several countries change in curricular structure also attempts to homogenize the teaching and training of psychiatry across the globe understanding the regional trends regional needs and exercising evidence based and innovative techniques of teaching and training may strengthen psychiatry learning south asia is a densely populated region catering about 2 billion populations with homogeneity among this huge population however there is no comprehensive book comparing and contrasting teaching and training in south asia hence this book aims to achieve this

a guide to the thesis literature on china and inner asia written between 1976 and 1990 includes more than 10 000 entries for dissertations in the arts and sciences law medicine theology engineering and other disciplines entries are grouped in topical

chapters and each entry includes bibliographic information and an abstract

does the mental health system abuse service users what makes the relationship between mental health and crime so problematic why is mental health care obsessed with risk this challenging and lively text considers these and other contentious questions surrounding the delivery of modern mental health care drawing together respected authors in the field each chapter focuses on a controversial issue that is often overlooked or ignored the alternative perspectives presented encourage readers to reflect critically on their own role including what they do whom they do it for and what the implications are for service users critical issues in mental health is a stimulating read from which all students and practitioners will take something positive it is essential reading for all those engaged in mental health care book jacket
