how to draw what you see easily and magically fast by larry j sparks
i have been an artist hobbyist for about 25 years i started out late in life learning to create artistic drawings and paintings i did not invent this technique to learn how to draw what you see it has been around for more than a century i just want to share what i learned the technique is simple so don t overthink it what you are going to do is learn how to draw what you see your brain takes care of the rest

most of us have 2 hands if not then you will need another object to observe in my case i learned to draw with my right dominant hand by observing my left or other hand pretty simple and only costs a little ink or pencil lead for most people starting out regardless of age you can train your brain to drive your dominant hand holding the pencil or whatever medium you choose by looking at your other hand and not lifting the pencil from the paper or looking at the result of your sketch until you are finished keep your eyes only on the subject you are drawing you say no way generally you will see progress in just a couple of weeks or so you will want to keep practicing to get better you may even want to draw your foot or some other object if you become bored looking at your non dominant off hand but you will see incredible progress and with practice from time to time you will learn a skill that should last as long as you like to draw or paint in fact after 25 years i can fire up photoshop set up a brush and color and use my mouse right dominant hand to draw and paint directly on the screen without ever looking at the mouse wow beats the heck out watching stuff on the box when you can learn a useful skill instead and it is a great hobby
