vol 2 33 include papers read at the annual conference of the indian economic association

the indian economy continues to grow rapidly taking in its stride poor harvests and rising oil prices industrial output has increased to double digit levels accompanied by rising

levels of savings and investment an important factor in this process has been india s relative political stability what are the constraints to maintaining a high rate of growth over the next decade or two these questions acquire special significance as we try to understand long term growth in the current context of global economic slowdown the papers in this volume seek to answer these questions

this book aims to trigger a wider examination of asian economic integration it looks at the institutional progression of regional economic integrations in countries in asia including japan korea and china it also looks at india s participation in the asian market and how it will affect other east asian countries

fiji has distinct institutional features that make it an ideal case for examining and discussing the consequences of institutional arrangements particularly the nature of property rights for national economic performance development prospects and the state of the environment which in turn reflects a nation s ability to achieve sustainable development furthermore the nature of institutional arrangements in fiji can be used to illustrate aspects of both the new and the old institutional economics apart from the fact that fiji provides considerable scope for the exploration of institutional economics and its applications fiji is a comparatively important island nation in the south west pacific that is an important member of the pacific island forum grouping of 14 island nations the recent development of fiji has been much influenced by its social history particularly by its institutional structures established or codified during british colonial rule its present racial composition is largely a product of british colonisation of indians brought to fiji by the british to produce sugar cane as a contribution to the economic development of the former british empire in many respects the type of global imperialism that was well established during the nineteenth century was a forerunner to modern economic globalisation which involves a mixture of free trading blocs and multilateralism the current population mixture of fiji consisting of about equal numbers of indian fijians and indigenous fijians has its roots in fiji s colonial history furthermore the codified systems

of property rights which largely excludes Indian Fijians from the ownership of land was established by the British. It has been a major source of ethnic tension and of social and political conflict in Fiji. We show that this system of property rights has had important negative consequences for economic growth in Fiji for the economic performance of its industries and for the conservation of its natural resources. Natural resources which may not be equitable and which also does not appear to be efficient administratively this adds to social and political tension in Fiji.

Indian economy is undergoing structural changes. The share of agriculture and allied activities in GDP has declined over the years. On farm jobs are diminishing or stagnant. There is a need to generate off farm jobs through secondary and tertiary processing of agriculture, crop, horticulture, animal husbandry, fisheries, forest produce, raw material and these are not increasing to keep pace with the needs despite potential in India. More than 75% of agro processing is done by informal and small enterprises but most informal and small units suffer from market and technology constraints. Therefore, they cannot go for higher value addition from the main products and from the by-products. These informal and small enterprises are not in a position to create an integrated value chain which can have links with the farmers as technology is outmoded. These units are not in a position to give quality assurance and meet food safety standards. Their products are marketed only in less demanding nearby local markets. World over there is transition from informal and small agro industrial enterprises to large units which are competitive in terms of price and quality. Equitable not exploiting any member of value chain and inclusive treating farmers as strategic business partners rather than adversaries. They use latest and innovative technology and have national and international markets for selling their products. They enjoy scale economies are able to comply with national and international standards of quality assurance and go for higher level of value addition. They can forge linkages with the farmers through contract farming and direct procurement and assure their raw material supply by treating the farmers as strategic business partners.

but these enterprises require the enabling conditions which make it possible to run the enterprises profitably along with transformation of rural areas over the years the government of india and nearly all the state governments have now created most attractive enabling environment therefore in our assessment india is poised for a great leap in investments in food processing and marketing the book contains 18 chapters dealing with the entire project cycle of agro industries for sustainable rural transformation the most insightful part is the 12 real life case studies the book would be useful to agro entrepreneurs agro processing industries policy makers bankers management consultants students of agriculture universities cooperative management training institutions and mba students
