created by winston churchill to sabotage and subvert the enemy in wwii the special operations executive soe was an innovative and at times infamous group a band fanatically devoted to the allied cause and willing to do whatever it took to advance it and hamper the axis even operating within north america

the creation and intense training regimens of the british special operations executive and the american office of strategic services leading into wwii winston churchill famously instructed the head of the special operations executive to set europe ablaze agents of both the british special operations executive and the american office of strategic services underwent rigorous training before making their way undetected into occupied europe working alone or in small cells often cooperating with local resistance groups agents undertook missions behind enemy lines involving sabotage subversion organizing resistance groups and intelligence gathering the soe's notable successes included the destruction of a power station in france the assassination of himmler's deputy reinhard heydrich and ending the nazi atomic bomb program by destroying the heavy water plant at vemork norway oss operatives established anti nazi resistance groups across europe and managed to smuggle operatives into nazi germany including running one of the war's most important spies german diplomat fritz kolbe all of their missions were incredibly dangerous and many agents were captured tortured and ultimately killed the life expectancy of an soe wireless operator in occupied france was just six weeks in no moon as witness historian james stejskal examines why these agencies were established the training regime and ingenious tools developed to enable agents to undertake their missions their operational successes and their legacy the book is well organized and also an excellent read it examines the close history of the soe and oss and how they worked together or not in addition the tools of the trade chapter includes images and sketches that often do not appear in other books so far

soe the special operations executive was a small tough british secret service a dirty tricks department established in july 1940 and encouraged by churchill to set europe ablaze recruited from remarkably diverse callings the men and women who were members of this most secret agency lived in great and constant danger their job as saboteurs informers partisans couriers or secret agents was to support and stimulate resistance behind enemy lines their credentials fortitude courage immense patience and a devotion to freedom in this classic study m r d foot sheds light on the heroism of individual soe agents across the world and provides us with a spellbinding account of the executive's crucial wartime work with an introduction by david

stafford

in the early years of world war ii prospective agents for the special operations executive were trained in the black arts of camouflage sabotage and subterfuge this training took place in a variety of requisitioned country houses all over britain from arisaig in the highlands of scotland to beaulieu manor in the new forest this book reproduces the extensive training manuals used to prepare agents for their highly dangerous missions behind enemy lines the courses covered a variety of clandestine skills including disguise surveillance burglary interrogation close combat and assassination in short everything needed to wreak havoc in occupied europe denis rigden s expert introduction sets the file in its historical context and includes stories of how these lessons were carried out on actual wartime missions

this study first published in 1966 has been updated from closed government records to offer a more complete overview of the activities of the soe and how it fitted into the allied war effort in the french theatre of operations

this work s focus is on the women who served as secret agents during world war ii for the special operations executive soe in great britain and the office of strategic services oss in the united states the argument presented herein states that the existing historiography featuring female agents oversexualizes and deprives the women of their agency by suggesting that the women would have been less successful in their missions if they were less attractive the histories discussed in this work focused on the physical appearances and sexuality of their subjects which resulted in volumes of information that detracted from the successes of the women throughout the war this thesis also examines the effect that society had on constructing the ideas of femininity and masculinity that encouraged the authors to depict the women and their accomplishments as abnormal for the time or as resulting from the use of their sexuality the introduction informs the reader about the lives of women in great britain and the united states prior to wwii their entry into the workforce the creation of the soe and the oss each agency s selection process for potential agents the training they received and the historiographical issues that are found throughout the literature by comparing the two nations and their treatment of women in the workforce and more specifically in the secret spy organizations this researcher found distinct differences in the ways women were discriminated against within the agencies based on how the societies in each nation viewed women in the workforce chapters two and three serve to retell the histories of nine female agents who worked for the soe and the oss during the war both chapters exclude reference to the beauty and sexuality of the women in order to focus on the missions and the accomplishments of the agents presented in other histories chapter four details the policy changes that have occurred since world war i policies adopted before and during wwii and the subsequent laws that have

passed regarding women in the military this chapter also argues that it was due to the female agents of the soe and oss that the governments in both nations allowed women more freedoms and the option to join the armed forces with full military status after wwii the final chapter develops the argument that the women in the existing historiography are oversexualized and their agency is diminished because the authors as well as society in the 1940s was socially constructed to view certain occupations as masculine or feminine thus the authors wrote their histories within a gendered paradigm that has not been altered much since the first monograph about the women agents was published over thirty years ago i suggest that at least on some level the authors had a responsibility to their audiences to give accurate and non gendered histories of the female agents it is my intention to offer another less gender specific approach to the historiography one that focused on the accomplishments of the agents and not on their beauty or sexual partners my intention is to draw attention to the flawed and biased approach taken by many of the authors whether it was intentional or subconscious on their part

as engaging as it is astonishing this book provides extremely important revelations and striking pen portraits etched in acid of the main actors certainly the sources are fabulous john erickson author of the road to stalingrad a well written account filled with original material and documentation good reading for anyone interested in the history of wwii intelligence publishers weekly starred review
