this book introduces edumetrics a rigorous interdisciplinary framework for measuring learning outcomes over time and across space based on lord kelvin s maxim that to measure is to know edumetrics redefines education as an empirical science that integrates economics psychology and social science to quantify cognitive and non cognitive competencies by harmonizing data from over 120 countries spanning half a century the book transforms fragmented indicators into coherent measures of learning quality and equity it critiques the limitations of traditional human capital theory and challenges the use of years of schooling as a proxy for skill through econometric analysis historical inquiry and global datasets including learning adjusted years of schooling it reveals that educational structures not just resources shape productivity adaptability and social cohesion at its core the book addresses the paradox of why rising investments in schooling have not yielded proportional gains in learning with its integration of theory data and historical perspective it serves as both a methodological blueprint and a call to rethink how we define measure and value learning in the twenty

first century

the field of data mining has made significant and far reaching advances over the past three decades because of its potential power for solving complex problems data mining has been successfully applied to diverse areas such as business engineering social media and biological science many of these applications search for patterns in complex structural information in biomedicine for example modeling complex biological systems requires linking knowledge across many levels of science from genes to disease further the data characteristics of the problems have also grown from static to dynamic and spatiotemporal complete to incomplete and centralized to distributed and grow in their scope and size this is known as big data the effective integration of big data for decision making also requires privacy preservation the contributions to this monograph summarize the advances of data mining in the respective fields this volume consists of nine chapters that address subjects ranging from mining data from opinion spatiotemporal databases discriminative subgraph patterns path knowledge discovery social media and privacy issues to the subject of computation reduction via binary matrix factorization

although chaos theory refers to the existence between seemingly random events it has been gaining the attention of science technology and managements fields the shift from traditional procedures to the dynamics of chaos and complexity theory has resulted in a new element of complexity thinking allowing for a greater capability for analyzing and understanding key business processes chaos and complexity theory for management nonlinear dynamics explores chaos and complexity theory and its relationship with the understanding of natural chaos in the business environment utilizing these theories aids in comprehending the development of businesses as a complex adaptive system

several internal and external factors have been identified to estimate and control the psycho biological stress of training in order to optimize training responses and to avoid fatigue overtraining and other undesirable health effects of an athlete an increasing number of lightweight sensor based wearable technologies wearables have entered the sports technology market non invasive sensor based wearable technologies could transmit physical physiological and biological data to computing platform and may provide through human machine interaction smart watch smartphone tablet bio feedback of various parameters for training load management and health however in theory several wearable technologies may assist to control training load but the assessment of accuracy reliability validity usability and practical relevance of new upcoming technologies for the management of training load is paramount for optimal adaptation and health

through analysis of the european union emissions trading scheme eu ets and the clean development mechanism cdm this book demonstrates how to use a variety of econometric techniques to analyze the evolving and expanding carbon markets sphere techniques that can be extrapolated to the worldwide marketplace it features stylized facts about carbon markets from an economics perspective as well as

covering key aspects of pricing strategies risk and portfolio management

neurotrauma and critical care of the brain 2nd edition by renowned neurosurgeons jack jallo and christopher loftus incorporates salient components of the highly praised first edition the updated text reflects cutting edge discussion on traumatic brain injury management in a neurocritical care setting contributions from top experts in neurosurgery neurology critical care cardiac and pulmonary care and trauma surgery provide a concise review of a complex and evolving field the book lays a solid foundation with discussion of tbi classification pathophysiology key blood biomarkers noninvasive neuromonitoring in severe tbi patients multimodality monitoring in neurocritical care and brain imaging modalities from the prehospital setting to intensive care top experts share clinical pearls and core guidelines on the management of mild moderate and severe tbi and complications chapters new to this edition include concomitant injuries orbital facial fractures vascular injuries spine fractures autonomic dysfunction and temperature management key highlights specialized topics include wartime penetrating injuries cardiovascular complications of tbi venous thromboembolism prophylaxis ethical considerations tbi costs in the u s and the financial return on helmets management of pediatric brain injuries in the nicu with illustrative cases nearly 200 high quality illustrations facilitate understanding of complex anatomy and techniques summary tables provide a handy overview of injury type causes characteristics and recommended imaging modalities this remarkable resource is essential reading for neurosurgeons neurologists trauma physicians critical care and rehabilitation medicine specialists and residents in these specialties paired with neurotrauma and critical care of the spine 2nd edition this dynamic duo is the most up to date neurocritical care reference available today

warning don t fly solo before you understand all the dangers of the killing zone it could save your life this survival guide for new pilots identifies the pitfalls waiting inside the killing zone the period from 50 to 350 flight hours when they leave their instructors behind and fly as pilot in command for the first time although they re privately certified many of these unseasoned aviators are unaware of the potential accidents that lie ahead while trying to build decision making skills on their own many times falling victim to inexperience based on the first in depth scientific study of pilot behavior and general aviation flying accidents in over 20 years the killing zone second edition offers practical advice to help identify the time frame in which you are most likely to die author and aviation specialist paul craig offers rare insights into the special risks new pilots face and includes updated preventive strategies for flying through the killing zone alive new to the second edition dealing with glass cockpits gps moving maps collision avoidance systems including a new chapter on available safety versus actual safety alerts you to the 12 mistakes likely to kill you provides guidelines for avoiding evading diverting correcting and managing dangers includes a pilot personality self assessment exercise for an individualized survival strategy
