unless you have unbeatable boatspeed tactics are vital to winning sailboat races multi champion nick craig shows you how to develop a strategy and what tactics to adopt on every leg and at every mark of the course his first book helming to win was described as original thought provoking like no other that has gone before it he now turns his highly analytical mind to the subject of tactics he discusses the inputs into strategy starting and the race plan going through each leg in turn nick then tackles mark tactics covering every different type of mark and fleet tactics on every leg of the course he finally focusses on boat to boat tactics again on every leg of the course in each situation he covers attacking and defensive tactics either to get ahead or make sure you stay ahead non spinnaker symmetrical spinnaker and asymmetric dinghies are all covered because nick has won world or national championships in each of these types of boats having read nick s first book many said that it had transformed the way they sailed this book will have the same effect on your tactics and should see you moving up the leaderboard

the crew of a racing yacht is as important as the helmsman indeed if you master the techniques in this book you should be able to take your pick of boats and helmsmen winning begins in the mind and andy hemmings first shows you how to set realistic goals

and get your attitude right he then demonstrates how to set up the boat so you can work it efficiently and how to get it fit for the job the bulk of the book covers the technical aspects of crewing with each manoeuvre examined in detail and explained in words and photosequences finally andy looks at the crew s responsibilities in a race and when sailing a series this book covers all the major classes plus the new breed of twin wire boats with asymmetric kites it could take you from club sailor to world champion and even to an olympic medal the series the sail to win books cover every aspect of competitive sailing written by world class sailors and coaches they are designed to take a competent sailor through the club racer barrier to compete successfully in international fleets
