a large part of academic literature business literature as well as practices in real life are resting on the assumption that uncertainty and risk does not exist we all know that this is not true yet a whole variety of methods tools and practices are not attuned to the fact that the future is uncertain and that risks are all around us however despite risk management entering the agenda some decades ago it has introduced risks on its own as illustrated by the financial crisis here is a book that goes beyond risk management as it is today and tries to discuss what needs to be improved further the book also offers some cases

the progress of society can only happen through interpersonal cooperation because only cooperation can bring about mutual benefit thus bringing happiness to each person this should be our collective rationality but we often see it conflicts with individual interests which leads to the so called prisoners

dilemma and does not bring happiness to all from a game theoretical perspective this book addresses the issue of how people can cooperate better it has two objectives the first is to use common language to systematically introduce the basic methodologies and core conclusions of game theory including the nash equilibrium multiple equilibriums dynamic games etc mathematics and theoretical models are used to the minimum necessary scope too to make this book get access to ordinary readers with elementary mathematical training the second objective is to utilize these methods and conclusions to analyze various chinese social issues and institutional arrangements with a focus on the reasons people exhibit non cooperative behaviors as well as the institutions and cultures that promote interpersonal cooperation in addition to economics specialists in sociology law history politics and management will also be attracted by this book for its insightful analysis on the issue of cooperation in these fields also readers curious about chinese society will benefit from this book

distance education is expanding at a faster rate cutting across national and regional boundaries with the advent and spread of information and communication technology ict distance education has embarked on a path of collaboration networking and globalization quality and accreditation of distance learning programmes and experiences have become highly significant in the ict enabled education system this edited book is a compilation of selected papers submitted for the international conference 2005 of international council for distance education icde the papers are grouped into four major themes internationalisation collaboration and networking ict enabled distance education quality assurance and distance education for development covering these four major themes the selected papers give an overview of the present scenario of open and distance learning the world over contributors of this book bring in their experience and reflect on issues related to networking resource sharing collaboration globalization and discuss challenges and possible solutions in the ict enabled education section issues covering practice attitude towards technology and learning in online world are discussed quality issues in distance education are discussed in section three and how distance learning can influence educational and societal development are discussed in the last section
