natural and synthetic waxes a compilation of all relevant information for the production and use of waxes in technical applications waxes are among the oldest organic substances used by mankind before all others beeswax is known to have played a role in human history for thousands of years but over time many other wax species have been detected and exploited and prepared for different utilizations today we possess knowledge of a great variety of different types of waxes unfortunately there still is no broadly accepted definition of a wax for the relatively few wax chemists waxes are usually defined by their physico chemical properties more than by their chemical constitution waxes are not uniform but oligomeric and polymeric substances not simply describable with a chemical formula the realm of waxes encompasses fully or partly natural refined partly or fully synthetic products which can be extended by wax like products which do not fulfil all definition criteria waxes are offered in different forms like pellets granules powders or micropowders their number of technical applications runs into thousands however waxes in most cases are just adjuvants or additives and with few exceptions like candles not known to a broader public only few publications over the last decades tried to present a more comprehensive overview of their chemistry chemical composition their physical and analytical properties their applications and their sometimes astonishing history based on personal experience and expertise the authors intend to present an overview on the main classes of waxes their origin history future and potential fate economical aspects like market size and development ecological impacts and challenges and regulatory issues are also addressed waxes are indispensable products in everyday life and in industry

and technology though mostly not even visible or distinguishable to experts they deserve more than the role of a poor cousin in chemistry and technology

when the rand collapsed from 7 60 to 13 84 to the us dollar in 2001 kevin wakeford blew the whistle accusing three big corporates and one global bank of being party to manipulation in the currency markets wakeford predicted that the rand was on its way to 20 30 40 and possibly 50 to the dollar which would have thrown the seven year old democracy into economic and political turmoil as a result of his intervention a rand commission was set up by president mbeki to investigate his claims and the rand s collapse was arrested and reversed the rand commission was however shut down prematurely and wakeford was fired as ceo of the south african chamber of business while the enron and worldcom scandals in the united states triggered comprehensive corporate reform it seemed that south african authorities were determined to cover up any wrongdoing in the assault on the rand barry sergeant tells the explosive story of the rand s collapse and the events that followed he also explores more recent banking scandals around the world giving a hard hitting exposé of greed collusion and manipulation in the markets
