after fifty years of development and refinement in transactional analysis ta the theory of methods and the actual methods have changed considerably from those originally published by eric berne many concepts and methods have emerged and been subject to clinical experimentation some have been refined and expanded and some are no longer used this book includes contributions from several authors each of whom presents his or her unique focus on how ta is used in their psychotherapy practice this book will address the therapeutic effectiveness of various methods in ta and will cover a variety of topics such as unconscious experience transference countertransference the therapist s transparency transgenerational scripts trauma and regression psychological games the self destructive client an integrative approach to the psychotherapy of obsession gender psychopolitics and psychotherapy from a social cognitive perspective it is written for both psychotherapists and counsellors who want to learn and refine their knowledge of contemporary ta methods that are most effective with today s clients

this introductory psychology textbook focuses on mind bugs foibles of the mind that are intrinsically fascinating and provide fundamental insights into how the mind works it outlines the most essential research in psychology and neuroscience

the result of an exclusive partnership with scientific american the articles in this collection were personally selected from the pages of world s foremost scientific magazine by the authors dan schacter dan gilbert and dan wegner

this globally focused and renowned textbook spans the entire discipline of psychology from the fundamental principles of psychology as a science to more nuanced approaches in core disciplines such as cognitive developmental social and personality psychology woven together

with engaging features research boxes and activities that will help students to both think like a scientist and stretch their imagination in depth and yet written with irresistible enthusiasm and humour by a world renowned team of psychologists and researchers this book is a complete course companion for all undergraduate psychology students it is both engaging and yet scientifically sound and theoretically rigorous the only book students need as they begin their study of psychology

essa é uma obra única e muito relevante por condensar em um único volume o que precisamos saber para atuar com pessoas com altas habilidades afirma em primeiro lugar que os superdotados as existem e estão bem próximos a nós explorando a seguir as bases de pensamento para compreendê los as segue expondo de forma clara e acessível como identificá los e de quais recursos dispomos para seu atendimento tornando se uma ferramenta imprescindível para os profissionais envolvidos na atenção a essa população dra christina cupertino coordenadora do núcleo paulista de atenção à superdotação npas o livro de rondini e reis impressiona por sua abrangência e pela escolha de temas cruciais para o entendimento das altas habilidades e superdotação e sua aplicação prática tanto em sala de recursos quanto em salas regulares com enfoque inclusivo no diálogo dinâmico e criativo de um professor antenado com o professor desavisado e um aluno superdotado curioso o livro perpassa por assuntos que o professor precisa saber para ajudar o desenvolvimento do potencial destes alunos traz reflexões sobre diferentes teorias e formas de se olhar a superdotação aspectos que precisam ser discutidos e avaliados se realmente quisermos tirar o superdotado da invisibilidade angela virgolim phd especialista em altas habilidades e superdotação pelo renzulli center for creativity gifted education and talent development embora o bem delineado projeto deste livro objective a especialização no assunto ao transitar por suas páginas fica evidente que também será um grande recurso para quem deseja saber mais sobre as altas habilidades superdotação a obra obedece a uma coerência docente mas encanta e surpreende pela abrangência dos assuntos pela qualidade da contribuição desses novos autores que souberam discorrer aliando sua experiência aos fundamentos dos melhores pesquisadores da área e pela seriedade com que a superdotação é tratada somente quem acredita no que faz e pratica com paixão é capaz de expressar suas ideias com tamanha exatidão ma maria lucia sabatella pesquisadora na área da inteligência e superdotação fundadora e presidente do instituto para otimização da aprendizagem inodap este livro fornece as principais etapas para um efetivo atendimento ao estudante superdotado dos aspectos teóricos sobre o assunto sem cercear abordagens até os seus desdobramentos no campo da identificação e do atendimento desse alunado o livro traz modelos e exemplos que ajudarão os leitores a colocar em prática um protocolo de identificação atendimento e registro de tais ações em sua escola clínica ou outra tipificação de serviço educacional especializado ao superdotado

this widely used enthusiastically received textbook is the work of one of the most accomplished author teams in introductory psychology each a distinguished educator and researcher together they offer an approachable engagingly written survey of the field's main ideas filled with unusual stories memorable examples and lots of humor to captivate all kinds of students features include hot science highlighting important and interesting new research the real world highlighting applications of psychological research to real world contexts other voices offering excerpts of great writing about psychology and showing how important psychology is to public discussion changing minds questions at the end of the chapter that ask students to confront a scenario using information from the chapter the new edition has been reshaped for the classroom chapter by chapter sections in each chapter now have specific learning outcomes in place to emphasize big picture concepts and guide student learning there is also new boxed feature called a world of difference highlighting important research on diversity and individual differences

a great read is just the beginning instructor and student evaluations from coast to coast attest to the dans captivating writing these award winning bestselling authors know how to enthrall students with the subject they love best psychology but in the new edition of introducing psychology they go even further to ensure that students won't commit one of the seven sins of memory forgetting what they just read special cue questions and critical thinking questions give students the opportunity to process psychological concepts and aid their understanding and memory and if you've ever heard someone parrot a widespread misconception you'll welcome the new changing minds questions short scenarios which ask students to confront common misunderstandings of psychological phenomena now the book that students love to read is as unforgettable as ever dsm 5 updates available for fall 2014 classes this update version features new content from the dans in response to the release of the dsm 5 this new content is integrated into the text without changing pagination or the structure of the chapters a special dsm 5 supplement by the matthewnock new coauthor with the dans of psychology third edition is available for fall 2013 and spring and summer 2014 courses

the book outlines a fundamental alternative to the rising wave of aggressive biological reductionism and brainism in contemporary psychology and education it offers steps to achieving a daunting and elusive goal constructing a coherently non reductionist account of the mind the main obstacle to such a construction is identified as the centuries old contemplative fallacy that leads to entrenched dualisms and shackles major theoretical frameworks the alternative agentic activity perspective overcomes this fallacy by advancing the core principles of the cultural historical activity theory this innovative perspective charts a consistently non mentalist and non individualist view of psychological processes without discarding the individual mind a vast body of research and theories from piaget and dewey to sociocultural and embodied cognition approaches are critically engaged with a special focus on piotr

galperin's contribution the notion of the embodied agent's object directed activity serves as a pivotal point for re conceptualizing the mind and its role in behavior in a radical departure from both the traditional mentalist and biologically reductionist frameworks psychological processes are understood as taking place beyond the brain as constituted by the agent's activities in the world from this standpoint many of vygotsky's key insights including semiotic mediation internalization and cognitive tools are given a fresh scrutiny and substantially revised the agentic activity perspective opens ways to offer a bold vision for education developmental teaching and learning built on the premise that real knowledge is not information storage and retrieval and that education is not about knowledge transmission but instead it is about developing students minds

this widely used enthusiastically received textbook is the work of one of the most accomplished author teams in introductory psychology each a distinguished educator and researcher and three of them schacter gilbert and wegner authors of bestselling books for general readers together they offer an approachable engagingly written survey of the field's main ideas filled with unusual stories memorable examples and lots of humor to captivate all kinds of students again carried by the authors exceptional communication and teaching skills the new edition has been retooled for the classroom chapter by chapter sections in each chapter now have specific learning outcomes in place to emphasize big picture concepts and guide student learning there is also new boxed feature called a world of difference highlighting important research on diversity and individual differences plus new data visualization activities in launchpad to help students build quantitative reasoning skills
