the present volume of the handbook of the history of logic brings together two of the most important developments in 20th century non classical logic these are many valuedness and non monotonicity on the one approach in deference to vagueness temporal or quantum indeterminacy or reference failure sentences that are classically non bivalent are allowed as inputs and outputs to consequence relations many valued dialethic fuzzy and quantum logics are among other things principled attempts to regulate the flow through of sentences that are neither true nor false on the second or non monotonic approach constraints are placed on inputs and sometimes on outputs of a classical consequence relation with a view to producing a notion of consequence that serves in a more realistic way the requirements of real life inference many valued logics produce an interesting problem non bivalent inputs produce classically valid consequence statements for any choice of outputs a major task of many valued logics of all stripes is to fashion an appropriately non classical relation of consequence the chief preoccupation of non monotonic and default logicians is how to constrain inputs and outputs of the consequence relation in what is called left non monotonicity it is forbidden to add new sentences to the inputs of true consequence statements the restriction takes notice of the fact that new information will sometimes override an antecedently and reasonably derived consequence in what is called right non monotonicity limitations are imposed on outputs of the consequence relation most notably perhaps is the requirement that the rule of or introduction not be given free sway on outputs also prominent is the effort of paraconsistent logicians both preservationist and dialethic to limit the outputs of inconsistent inputs which in classical contexts are wholly unconstrained in some instances our two themes coincide dialethic logics are a case in point dialethic logics allow certain selected sentences to have as a third truth value the classical values of truth and falsity together so such logics also admit classically inconsistent inputs a central task is to construct a right non monotonic consequence relation that allows for these many valued and inconsistent inputs the many valued and non monotonic turn in logic is an indispensable research tool for anyone interested in the development of logic including researchers graduate and senior undergraduate students in logic history of logic mathematics history of mathematics computer science ai linguistics cognitive science argumentation theory and the history of ideas detailed and comprehensive chapters covering the entire range of modal logic contains the latest scholarly discoveries and interpretative insights that answers many questions in the field of logic

the conference addresses the subjects of regional development in an integrated way in accordance with the principles of sustainability and provides a common forum for all scientists specialising in the range of subjects included within sustainable development and planning

this edited volume discusses the contextual nature of strategic entrepreneurship it unfolds the concept of context in strategic entrepreneurship and demonstrates how entrepreneurial strategies differ among various countries societies and entrepreneurial ecosystems written by global experts in strategic entrepreneurship research chapters discuss emerging issues in the field such as barriers to strategic entrepreneurship entrepreneurial resourced based view mixed embeddedness social media marketing competitiveness in small enterprises strategic learning and the triple helix approach to university business government strategic cooperation affirming that strategic decisions planning and formulations are greatly context related endeavors and hence any true understanding of entrepreneurial strategy starts with appropriate understanding of relevant context this volume makes a vital contribution to the discussion of strategic entrepreneurship
