do you wonder how movies sequences of static frames appear to move or why 3 d films look different from traditional movies why does ventriloquism work and why can airliner flights make you feel disoriented the answers to these and other questions about the human senses can be found within the pages of foundations of sensation and perception this third edition maintains the standard for clarity and accessibility combined with rigor which was set in previous editions making it suitable for a wide range of students as in the previous editions the early chapters allow students to grasp fundamental principles in relation to the relatively simple sensory systems smell taste touch and balance before moving on to more complex material in hearing and vision the text has been extensively updated and this new edition includes a new chapter devoted to attention and perception over 200 new references over 30 new figures and improved more colorful visual presentation a new companion website with a range of resources for students and lecturers the book contains a range of pedagogical features including

tutorial sections at the end of each chapter this distinctive feature introduces areas of the subject which are rarely included in student texts but are crucial for establishing a firm foundation of knowledge some tutorials are devoted to more advanced and technical topics optics light measurement bayesian inference but treated in an accessible manner while others cover topics a little outside of the mainstream music perception consciousness visual art foundations of sensation and perception will enable the reader to achieve a firm grasp of current knowledge concerning the processes that underlie our perception of the world and will be an invaluable resource for those studying psychology neuroscience and related disciplines

does the world appear the same to everyone does what we know determine what we see why do we see the world as we do vision is our most dominant sense from the light that enters our eyes to the complex cognitive processes that follow we derive most of our information about what things are where they are and how they move from our vision visual perception takes a refreshingly different approach to this enigmatic sense from the function that vision serves for an active observer to the history of visual perception itself the third edition has been extensively revised updated and expanded while still preserving the essential features of historical context neurophysiology and independent thought that made the earlier editions so engaging covering the perception of location motion object recognition and with up to date information on the workings of the visual brain the 3rd edition looks at how our ideas have been shaped not just by psychology but by art optics biology and philosophy the emphasis on understanding vision as a basis for action in the real world has also been expanded to cover seeing representations of all sorts whether they are pictures or computer generated displays the 3rd edition of visual perception is a readable accessible and truly relevant introduction to the world of perception and will be welcomed by students of visual perception as well as anyone with a general interest in the mysteries and wonder of vision

the vocal athlete third edition is written and designed to bridge the gap between the art of contemporary commercial music ccm singing and the science behind voice production in this ever growing popular vocal style revised and expanded this edition is a must have for vocal pedagogy courses and speech language pathologists singing voice specialists and voice teachers heavily referenced this text is ripe with current research on singing science as it relates to the ccm voice anyone who trains singers will gain insight into the current research and trends regarding commercial music artists the text distinguishes itself from other academic pedagogy texts by incorporating comprehensive chapters on the physiology of belting current peer reviewed literature in vocal training for ccm styles and application in the voice studio included is the current information on our understanding of gender affirmation treatments and potential implications for singers new to the third edition new comprehensive chapter titled overview of black american music history pedagogy practice by trineice robinson martin and alison crockett extended and revised sections in several chapters including the singer s body motor learning exercise physiology laryngeal physiology acoustics phonotrauma belting research reference grid depicting where specific content areas for both the proposed nats vocal pedagogy curriculum and the pava rv can be found within the text updated references throughout the text

vision is our most dominant sense from the light that enters our eyes to the complex cognitive provesses that follow we

derive most of our information about what things are where they are and how they move from our vision
