focusing on air pollution energy efficiency and climate change this book provides an introduction to japan s environmental policies and regulations and offers economic analyses and rias regulatory impact analysis of environmental regulations implemented or planned by the national and local governments the opening chapter reviews environmental economics and outlines the current status of rias in japan chapter 2 analyzes the nox pm act which prohibits the use of old and polluting vehicles in metropolitan areas chapter 3 examines a tokyo metropolitan government regulation which requires installation of pollution control equipment in older trucks that fail to meet emission standards chapter 4 traces the impact of the nox pm act on the used car market and used vehicle exports chapter 5 presents an economic analysis of a highway toll reduction revealing an unexpected negative social impact it increased traffic congestion and associated environmental problems the final three chapters address policies and regulations related to energy efficiency and climate change chapter 6 evaluates the effectiveness of japan s energy conservation act originally introduced in 1979 and amended numerous times to address climate change chapter 7 anticipates the impact of a proposed economy wide carbon tax using input output analysis to assess short term economic impacts in each sector also presented here is an examination of the effectiveness of a reduced carbon tax for energy intensive industries with a discussion of the impact of the proposal on households the final chapter discusses the role and limitations of economic models for evaluating japan s mid term ghg greenhouse gas emission target during the post kyoto period this is the first book to evaluate japanese environmental policies from an economic perspective using a variety of current quantitative approaches its findings and suggestions will benefit students policy makers and government officials in developing and developed countries where the public faces similar environmental problems

better transport is essential to myanmar s development after decades of underinvestment myanmar s transport infrastructure lags behind other regional countries sixty percent of trunk highways and most of the railways need maintenance or rehabilitation river infrastructure does not exist while 20 million people lack basic road access can the transport sector deliver upon the master plan s objectives what is needed to improve the quality of the infrastructure and services for the industry how can basic transport services be provided to all how can myanmar reduce the economic and social cost of transport these reports attempt to answer these questions

a research bulletin examining the japanese automotive industry s impact worldwide

a major aspect of japan s international economic success has been its industrial firms ability to develop a system of subcontracting with suppliers through an exploration of the evolution of subcontracting in japan as well as an analysis of its current practice in advanced economies nishiguchi reveals what he believes to be the shortcomings of existing theories of contractual relations he shows that subcontracting can be described as the evolutionary product of complex historical interaction among social political technological and company level strategic plans but not one constrained by culture this makes it possible for other countries to use models similar to those employed in japan encouraging continuous improvement in product quality and cost reduction

the significance in business and economic history of japan s startling rise in international competitiveness since the mid 1950s has not only given business academics much food for thought but has also served to increase the amount of english language writing on modern japan many researchers have sought to dissect the economic miracle isolating key factors which range from the national character and consensus to the favourable conjunction of market forces from unique structural elements and government policy to a free ride based in american support and free trade this new book uses a comparative perspective to shed important new light on the components of the miracle by looking at the key components of international competitiveness in japan and britain new light is shed on the secrets of japanese growth and refinement of allegations of british failure there are two contributions one written by a japanese scholar the other by a british scholar on the key variables the government industry relationship management structures education and training and finance the book concludes with new case studies of automobiles and electronics the essays revise many established notions concerning the two countries differences in education business links for example are not as pronounced as is often claimed and the performance gap in financial services is now much narrower the book will serve as a starting point for further research on the critical aspects of modern corporate behaviour and international competitiveness
