this volume contains a variety of problems from classical set theory and represents the first

comprehensive collection of such problems many of these problems are also related to other fields of mathematics including algebra combinatorics topology and real analysis rather than using drill exercises most problems are challenging and require work wit and inspiration they vary in difficulty and are organized in such a way that earlier problems help in the solution of later ones for many of the problems the authors also trace the history of the problems and then provide proper reference at the end of the solution

announcements for the following year included in some vols

examples help explain the seven basic mathematical problem solving methods including inference classification of action sequences working backward and contradiction
