this volume addresses an important historiographical gap by assessing the respective contributions of tradition and foreign influences to the 19th century codification of criminal law more specifically it focuses on the extent of french influence among others in european and american civil law jurisdictions in this regard the book seeks to dispel a number of myths concerning the french model s

actual influence on european and latin american criminal codes the impact of the napoleonic criminal code on other jurisdictions was real but the scope and extent of its influence were significantly less than has sometimes been claimed the overemphasis on french influence on other civil law jurisdictions is partly due to a fundamental assumption that modern criminal codes constituted a break with the past the question as to whether they truly broke with the past or were merely a degree of reform touches on a difficult issue namely the dichotomy between tradition and foreign influences in the codification of criminal law scholarship has unfairly ignored this important subject an oversight that this book remedies

with populist nationalist and repressive governments on the rise around the world questioning the impact of politics on the nature and role of law and the state is a pressing concern if we are to understand the effects of extreme ideologies on the state s legal dimensions and powers especially the power to punish and to determine the boundaries of permissible conduct through criminal law it is essential to consider the lessons of history this timely collection explores how political ideas and beliefs influenced the nature content and application of criminal law and justice under fascism national socialism and other authoritarian regimes in the twentieth century bringing together expert legal historians from four continents the collection s 16 chapters examine aspects of criminal law and related jurisprudential and criminological questions in the context of fascist italy nazi germany nazi occupied norway apartheid south africa francoist spain and the authoritarian regimes of brazil romania and japan based on original archival doctrinal and theoretical research the collection offers new critical perspectives on issues of systemic identity self perception and the foundational role of criminal law processes of state repression and the activities of criminal courts and lawyers and ideological aspects of and tensions in substantive criminal law
