lecture notes human physiology provides concise coverage of general physiology for medical students as well as students of biological sciences sport science pharmacology and nursing this fifth edition of the ever popular lecture notes human physiology has been thoroughly revised and updated by a new international team of authors the simple structure and systems based approach remain with a new clean layout for ease of reading and colour now incorporated to aid understanding lecture notes human physiology provides more focus on pathophysiology for clinical relevance is the perfect introduction for medical and allied health care students now includes physiology of pain and increased coverage of heart and the vascular system includes a completely revised chapter on the nervous system

this book is a compilation of human physiology lecture notes meant specifically for undergraduate and postgraduate medical students as well as biomedical nursing and other medical related courses the contributors of this book are the universiti sains malaysia physiology lecturers who have strived to present the information as accurately and effectively as possible the contents are arranged according to body systems which comprise cell and tissue respiratory system cardiovascular system gastrointestinal system renal system nervous system endocrine system reproductive system and musculoskeletal system this book is designed with the following features to facilitate quick revision of relevant physiology topics compact concise and readable text simplified tables colourful figures examples of short essay question it is hoped that this book will benefit the readers in one way or another happy reading

this review covers the major systems of human physiology these notes are not exhaustive and assume that students have completed a course in human physiology and wish to refresh their memory in preparing for an examination students are encouraged to refer to a comprehensive textbook or to monographs while using this review this book is a revised version of a review book used by our medical students for over ten years coverage of various topics in physiology is comparable to the percentage of questions on

those topics in recent national board part i examinations review questions follow every few pages of text in order to monitor your understanding of the just preceding material multiple choice questions are mainly of the two conventional types single best answer questions and multiple correct answer questions single correct answer questions have lettered alternatives i.e. a to e multiple correct answer questions have numbered alternatives i.e. 1 2 3 and 4 the latter questions are answered as follows answer a if 1 2 and 3 are correct answer b if 1 and 3 are correct answer c if 2 and 4 are correct answer d if 4 only is correct answer e if all are correct national board examinations also use matching questions and matching with four choices i.e. situation 1 situation 2 both 1 and 2 neither 1 or 2 review questions are numbered consecutively within each of the seven chapters

instant notes in human physiology will be valuable to students in whatever context they are studying physiology it explains fundamental concepts and the major physiological systems showing how they are integrated without overloading the reader with information

this accessible and friendly text is based on the premise that all nurses need a working knowledge of the normal functioning of the human body it is only when we understand the normal that the abnormal pathological situation makes sense if we can understand how the body goes wrong then it often becomes obvious what needs to be done to treat the disorder so physiology and pathophysiology can both be used to inform our clinical interventions and provide us with rationales for care in this concise text john campbell explains the physiology and necessary basic science in a way that is easy to understand and learn diagrams are an important part of this philosophy
