books studying the presence of Spain in American literature and the possible influence of Spain and its literature on American authors are still rare in 1955 appeared a pioneer work in this field Stanley T. Williams *The Spanish Background of American Literature* but that book went no further than W. D. Howells' *Familiar Spanish Travels* published in 1913. *The Last Good Land* covers most of the twentieth century including such groups as the Lost Generation and African American writers and exiles. It also considers the recent revolution in Spanish cultural and historical thought introduced by Américo Castro which several American writers discussed in this volume. It may be said to have anticipated recent studies. It has expanded on Williams' volumes but in the majority of cases these works limit their scope to a single period: the nineteenth century, the Spanish Civil War, a movement predominantly Romanticism, or authors known for their interest in Spain. Irving Hemingway. The result is often a lack of continuum or the exclusion of such authors as Saul Bellow, William Gaddis, or Richard Wright within American literature itself. *The Last Good Land* contains revisions of traditional interpretations of certain writers including Hemingway. The variety of authors treated both in respect to ethnicity and gender guarantees a varied and global view of Spanish culture by American writers.

In this book, available at last in paperback, Kauppi develops a structural constructivist theory of the European Union and critically analyses through French and Finnish empirical cases the political practices that maintain the Union's democratic deficit. Kauppi conceptualises the European Union as both an arena for political contention and a nascent political order. In this evolving multi-levelled European political field, individuals and groups construct material and symbolic structures of political power grounded in a variety of social resources such as nationality, culture, and gender. The author shows how the dominance of both executive political resources and domestic political cultures has prevented the development of European democracy. Supranational executive networks have become more autonomous, reinforcing the dominance of the resources they control. At the same time, national political cultures condition the political status of elected institutions such as the European Parliament. The book is particularly suited for undergraduate and graduate students in the fields of European politics, European Union studies, and international relations.

Examines 55 of Hemingway's short stories, all but seven of which were published in five collections between 1923 and 1938. This volume is meant to guide readers through the writing and publication and criticism of the stories with brief commentaries and conclusions designed to throw light on past readings of the stories and encourage the writing of original criticism. This volume is a comprehensive collection of critical essays on the taming of the shrew and includes extensive discussions of the play's various printed versions and its theatrical productions. Aspinall has included only those essays that offer the most influential and controversial arguments surrounding the play. The issues discussed include gender, authority, female autonomy, and unruliness, courtship and marriage, language and speech, and performance and theatricality.

Dr. Alexis Brooks de Vita takes up the challenge to develop culturally relevant modes of literary analysis of African diaspora literatures by identifying traditional African and diaspora figures of myth, religion, legend, and history that interact with African and diaspora literary heroines and their authors following upon Karla Holloway's arguments in *Moorings* and metaphors that African American and West African women share strong traits of storytelling that both isolate and identify their literatures. Brooks de Vita traces these traits to their religious, legendary, and historical sources, identifying African and diaspora female figures of power whose interaction with literary protagonists places personal stories among the collective historical and spiritual African diaspora experience, broadening and deepening each authorial voice by demonstrating how it breaks free of the European perspective of linear time and resonates in a timeless community whose members ceaselessly interact. African diaspora women's symbols of power assert their autonomous definitions of good and evil, enabled by decolonialist analysis as expounded by theorists such as Chinweizu, Jemie, and Madubuike, to be separated from universalizing Eurocentric or masculinist assessments. Symbols of inherent rootedness and empowerment are clearly identified, allowing the reader to perceive tales of salvation and success underlying and further developing literal tales of suffering, surrender, or loss. This will be of particular interest to students, scholars, and researchers of comparative literature as well as African American literature and African diaspora and women's studies.
