an eye opening and vital account of the future of our earth and our civilisation if current rates of global warming persist by the highly acclaimed author of high tide

this book must not be ignored it really is our final warning mark lynas delivers a vital

account of the future of our earth and our civilisation if current rates of global warming persist and it's only looking worse we are living in a climate emergency but how much worse could it get will civilisation collapse are we already past the point of no return what kind of future can our children expect rigorously cataloguing the very latest climate science mark lynas explores the course we have set for earth over the next century and beyond degree by terrifying degree he charts the likely consequences of global heating and the ensuing climate catastrophe at one degree the world we are already living in vast wildfires scorch california and australia while monster hurricanes devastate coastal cities at two degrees the arctic ice cap melts away and coral reefs disappear from the tropics at three the world begins to run out of food threatening millions with starvation at four large areas of the globe are too hot for human habitation erasing entire nations and turning billions into climate refugees at five the planet is warmer than for 55 million years while at six degrees a mass extinction of unparalleled proportions sweeps the planet even raising the threat of the end of all life on earth these escalating consequences can still be avoided but time is running out we must largely stop burning fossil fuels within a decade if we are to save the coral reefs and the arctic if we fail then we risk crossing tipping points that could push global climate chaos out of humanity's control this book must not be ignored it really is our final warning

analyzing representations and practices of consumption in the western world this book offers a perspective on the themes of counter consumerism ecological crisis and sustainability it is suitable for students in media cultural and literary studies as well as in sociology and environmental studies

many of the chapters in the present volume were first presented at the 2008 bsa annual conference of social worlds natural worlds held at the university of warwick  
acknowledgements

gives the complete picture of the single biggest issue facing our planet lays out the facts and assesses the options global and personal for dealing with the threat of a warming world page 4 of cover

a collection of readings and research papers that reflect upon and analyze issues in labor and industrial relations and their implications to the welfare of workers productivity organizational harmony and the attainment of a healthy national economy

a collection of essays based on the conference of the same name held at the univeristy of plymouth in april 2007 contributors are lyn hejinian barrett watten andrea brady allen fisher robert hampson richard kerridge peter middleton william rowe robert sheppard hélène aji andrew browne matt chambers brendan cooper ian davidson carrie etter kit fryatt piers hugill michael kindellan greg lainsbury catherine martin will montgomery eva mueller zettelman susan nurmi schomers christopher orchard robin peel kathy ann tan philip terry and scott thurston

this encyclopedia covers a vast range of topics concepts issues and processes on the subject of global warming such as atmospheric chemistry paleoclimatology biogeography oceanography geophysics glaciology soil science and more

what the environmental movement has been waiting for is a plane frequenting blissfully ignorant comedian with no green credibility whatsoever to tackle one of the most important issues of our time when non expert mark watson announced his intention to spend the year becoming less crap at the environment within 24 hours 500 mates and fans had joined him he lived for almost a week without plastic he ransacked libraries in order to read frightening books on climate change he lured audiences outside to plant trees confronted his morbid fear of bike riding even started eating vegetables and a man who began 2007 as a blight on the planet ended up coming to the attention of the most famous almost president in the world al gore

climate change is currently presented by campaign groups and scientists as an impossibly daunting threat on the face of it it would seem we must make impossible sacrifices if we want to do our bit for the environment and lead more sustainable less damaging lives this book shows that isn t the case at all it brings together household names who share a conviction that on the contrary living well needn t cost the earth and will tell you why and how their collective vision covering areas from architecture and

politics to food and happiness will completely reframe the way you think about climate change and what you're willing to do about it far from the usual doom and gloom many here argue that climate change presents a once in a century opportunity to address a whole basket of problems with energy and imagination if we get things right instead of an environmental apocalypse we could end up in a win win situation with both more satisfying lives and robust answers to these pressing seemingly unsurmountable problems contributions include phillip pullman a c grayling oliver james and john bird on love happiness and telling tales kevin mccloud nic marks stephen bayley and wayne hemmingway on good design hugh fearnley whittingstall colin tudge and rosie boycott on good and sustainable food david cameron and caroline lucas on the politics of the good life tom hodgkinson david boyle and david goldblatt on having a good time anita roddick adair turner ann pettifor and larry elliot on good business and work
