regimes of derivation in syntax and morphology presents a theory of the architecture of the human linguistic system that differs from all current theories on four key points first the theory rests on a modular separation of word syntax from phrasal syntax where word syntax corresponds roughly to what has been called derivational morphology second morphosyntax corresponding to what is traditionally called inflectional morphology is the immediate spellout of the

syntactic merge operation and so there is no separate morphosyntactic component there is no If logical form derived that is there is no structure which mirrors semantic interpretation If instead semantics interprets the derivation itself and fourth syntactic islands are derived purely as a consequence of the formal mechanics of syntactic derivation and so there are no bounding nodes no phases no subjacency and in fact no absolute islands lacking a morphosyntactic component and an If representation are positive benefits as these provide temptations for theoretical mischief the theory is a descendant of the author s representation theory and so inherits its other benefits as well including explanations for properties of reconstruction remnant movement improper movement and scrambling scope interactions and the different embedding regimes for clauses and dps syntactic islands are added to this list as special cases of improper movement

the book covers professional olympic and collegiate sports and each chapter has a fully developed introduction to explain the relevance of the articles to be presented
