suffering may be universal but it is not universally understood in this collection scholars from many nations and disciplines explore theoretical and practical approaches to understanding suffering as well as the ethics and effects of representing suffering in art and literature

grounded in the sister disciplines of sociology and anthropology this textbook is an accessible and critical introduction to contemporary social research alex khasnabish eschews the common disciplinary silos in favour of an integrated approach to understanding and practising critical social research situated in the north american context the text draws on cross cultural examples to give readers a clear sense of the diversity in human social relations it is organized thematically in a way that introduces readers to the core areas of social research and social organization and takes an unapologetically radical approach in identifying the relations of oppression and exploitation that give rise to what most corporate textbooks euphemistically identify as social problems focusing on key dynamics and processes at the heart of so many contemporary issues and public conversations this text highlights the ways in which critical social research

can contribute to exploring understanding and forging alternatives to an increasingly bankrupt violent unstable and unjust status quo

social psychologists have studied beliefs and values and related constructs such as attitudes and prejudice for decades but as this innovative and interdisciplinary book convincingly demonstrates the scientific examination of beliefs and values now influences research and practice across a range of disciplines specifically this edited volume explores the many cutting edge implications and applications of equilibrium or ei theory and the beliefs events and values inventory bevi grounded in twenty years of research and practice ei theory seeks to explain the processes by which beliefs values and worldviews are acquired and maintained why their alteration is resisted and under what circumstances they are modified based upon ei theory the bevi is a comprehensive analytic tool which examines how and why we come to see ourselves others and the larger world as we do as well as the influence of such processes on multiple aspects of human functioning edited by the developer of the ei model and bevi method and informed by contributions from leading u s and international scholars this book features captivating research findings and pioneering practice applications research focused chapters explain how the ei model and bevi method increase our conceptual sophistication and methodological capacity across a range of areas culture development environment gender personality politics and religion practice oriented chapters demonstrate how the bevi is used in the real world across a range of applied domains assessment education forensics leadership and psychotherapy written in an accessible and engaging manner this fascinating and timely volume speaks to many of the most pressing issues of our day by illuminating why we believe what we believe and demonstrating how our beliefs and values may be assessed explained and transformed in the real world key features presents an interdisciplinary theoretical model and innovative assessment method derived from two decades of work on the etiology maintenance and transformation of beliefs and values features contributions from leading scholars from the u s and internationally demonstrating the many implications and applications of this cutting edge approach for research and practice demonstrates the importance of making sense of beliefs and values in addressing many of the most pressing issues of our day

making sense of messages now in its second edition retains the apprenticeship approach which facilitates effectively learning the complex content and skills of rhetorical theory and criticism a new chapter on the rhetoric of ignorance provides needed theory and examples that help students deal with the new rhetorical landscape marked by such discursive complexities as fake news whataboutism and denial of science that creates rather than reduces uncertainty in public argument a new chapter curating and analyzing multimodal mediated rhetoric deals with problems of media criticism in the digital age it provides theory models of application and commentary that help novice critics understand and mindfully practice criticism that leads to insight not mere opinion throughout the book extended and updated examples and commentaries are designed to promote novice to expert agency in students this textbook is ideal for introductory courses in contemporary rhetoric rhetorical criticism and critical analysis of mass media

making sense of the senses provides an easily understandable and engaging overview of the senses the book allows readers insights into how humans and other animals perceive the world reflecting a level of knowledge similar to that acquired by studying neuroscience at an undergraduate level in order to offer an accessible introduction to the science it uses relatable examples to uncover the history evolution and biological principles of the way we see smell hear taste touch and more rather than only focusing on the five primary senses you can see on the cover making sense of the senses dives deep into the various methods

through which life across the planet surveys the world and guides the reader through the lesser known methods through which we humans interpret our surroundings in this way we come across some amazing abilities that we often forget we possess humans are nevertheless rather average creatures compared to many sensory specialists so when we compare our relatively modest capabilities to those of other species across the animal kingdom we are forced to yield our anthropocentric sense of supremacy this book will introduce how biological life developed the capacity to detect magnetic fields radioactivity and many more phenomena that until recently were inaccessible to humans by contextualising and comparing how the senses operate this book covers the sensory systems in a way no popular science book has previously done if you are starting your career in neuroscience or simply want to learn more about the ways our biology guides us through life making sense of the senses will change the way you think about our perception of the world

important new information in the second edition includes the roles of fiber gluten lactose and fructose in the development and treatment of ibs the use of probiotics and antibiotics to treat ibs similarities and differences between ibs and inflammatory bowel disease ibd the relationship between small intestine bacterial overgrowth and ibs how to make the most of your visits to a gastroenterologist lifestyle modifications that can improve symptoms of ibs making sense of ibs is an essential resource for anyone who has symptoms or a diagnosis of ibs as well as for health professionals who treat people with this complex disorder

this open access book explores the wicked problem of immigrant work integration with specific examples from canada bringing together a variety of disciplinary perspectives it discusses immigrant work integration as a process of sensemaking involving multiple actors immigrants organizations communities and governments and multiple scales individual interactional organizational and institutional the authors identify key players issues practices of support and avenues for future research this work contributes to enhancing the social impact of academic research by providing a comprehensive overview of the field of immigrant work integration for researchers in global mobility and organizational studies as well as practitioners

peter drucker has introduced us all to the knowledge era where knowledge is the primary resource and intangibles intellectual capital resources and assets are now largely recognized as the most important sources of organizations competitive advantage with the recognition of the importance of intangibles comes the problem of how to properly identify them and assign them a value within the corporation this is an area of concern in 5 fields 1 accounting and financial reporting 2 performance measurement and management 3 valuation in the finance field 4 the human resources field in terms of management strategy and planning and 5 intellectual capital over the past eight years over 25 methods have been proposed for the valuation of intangibles coming out of these 5 fields in this book andriessen evaluates 25 existing methods of intangible valuation according to highly developed criteria in performing his evaluations andriessen synthesizes the state of the art research from these fields based on extensive research he then presents his own method for valuing intangibles which he began developing and testing as a senior manager at kpmg knowledge advisory services in the netherlands he relates six case studies in which this method was tested in actual companies carefully reviews the results of his tests and then concludes by offering a new and improved method for valuing intangibles in his weightless wealth toolkit a complete step by step process for identifying valuing and managing intangibles to help managers operate successfully in the intangible economy

this book takes the following question as its starting point what are some of the crucial things the reader must do in order to make sense of a literary narrative

the book is a study of the texture of narrative fiction using stylistics corpus linguistic principles especially hoeys work on lexical patterning narratological ideas and cognitive stylistic work by werth emmott and others michael toolan explores the textual grammatical nature of fictional narratives critically re examining foundational ideas about the role of lexical patterning in narrative texts and also engages the cognitive or psychological processes at play in literary reading the study grows out of the theoretical questions that stylistic analyses of extended fictional texts raise concerning the nature of narrative comprehension and the readers experience in the course of reading narratives and particularly concerning the role of language in that comprehension and experience the ideas of situation repetition and picturing are all central to the books argument about how readers process story and toolan also considers the ethical and emotional involvement of the reader developing hypotheses about the text linguistic characteristics of the most ethically and emotionally involving portions of the stories examined this book makes an important contribution to the study of narrative text and is in dialogue with recent work in corpus stylistics cognitive stylistics and literary text and texture

in chris barker s sequel to cultural studies the author addresses the strengths and weaknesses of the discipline and investigates its practical and academic boundaries the author also clarifies its underlying themes of study

in this book kasper lippert rasmussen address the complexities of his question is affirmative action morally unjustifiable by analyzing the prevailing contemporary arguments both for and against affirmative action the book applies current political philosophy to demonstrate that arguments on both sides justify different conclusions given different specific cases though it ultimately does argue in favor of affirmative action based on the relative strength and significance of the anti discrimination and equality of opportunity based positions
