enthusiasm seeks to contribute to a culturally and historically nuanced understanding of how emotions secure and ratify the truth of convictions more than just pure affective intensity enthusiasm is about something a certainty clarity or truth neither as clearly negative as fanaticism nor as general as passion enthusiasm specifically entails belief for this reason the book takes its starting point in religion the social arena in which the concept was first debated and to which the term still gestures empirically based in modern german protestantism where religious emotion is intensely cultivated but also subject to vigorous scrutiny it combines historical and ethnographic methods to show how enthusiasm has been negotiated and honed as a practice in protestant denominations ranging from liberal to charismatic the nexus of religion and emotion and how it relates to central concepts of modernity such as rationality knowledge interiority and sincerity are key to understanding why moderns are so ambivalent about enthusiasm grounded in practice theory enthusiasm assumes that emotions are not an affective state we have but mind body activations we do having learned to perform them in culturally specific ways when understood as an emotional practice enthusiasm has different styles inflected by historical traditions social milieus and knowledge even ideologies about emotions and how they work enthusiasm also provides insight into how this feeling works in secular humanism as well as in politics and why it is so contested as a practice in any context
