Omar Khayyam's Secret Hermeneutics of the Rubaiyat in Quantum Sociological Imagination is a twelve book series of which this book subtitled New Khayyami Studies Quantumizing the Newtonian Structures of C. Wright Mills's Sociological Imagination for a New Hermeneutic Method is the first volume. Each book is independently readable although it will be best understood as a part of the whole series. In the overall series, the transdisciplinary sociologist Mohammad H. Tamdgidi shares the results of his decades-long research on Omar Khayyam, the enigmatic 11th-12th centuries Persian Muslim sage, philosopher, astronomer, mathematician, physician, writer, and poet from Nishapur, Iran, whose life and works still remain behind a veil of deep mystery. Tamdgidi's purpose has been to find definitive answers to the many puzzles still surrounding Khayyam, especially regarding the existence, nature, and purpose of the Rubaiyat in his life and works. To explore the questions posed, he advances a new hermeneutic method of textual analysis informed by what he calls the quantum sociological imagination to gather and study all the attributed philosophical, religious, scientific, and literary writings of Khayyam. In this first book of the series, following a common preface and introduction to the series, Tamdgidi develops the quantum sociological imagination method, framing his hermeneutic study in the series as a whole. In the prefatory note, he shares the origins of this series, and how the study is itself a moment in the trajectory of a broader research project. In his introduction, he describes how centuries of Khayyami studies, especially during the last two, have reached an impasse in shedding light on his enigmatic life and works, especially his attributed Rubaiyat. The four chapters of the book are then dedicated to developing the quantum sociological imagination as a new hermeneutic method, framing the Khayyami studies in the series. The method builds in an applied way on the results of Tamdgidi's recent work in the sociology of scientific knowledge, liberating sociology from Newtonian toward quantum imagination. Volume 1: Unriddling the Quantum Enigma (2020) where he explored extensively in greater depth and in the context of understanding the so-called quantum enigma, the Newtonian and quantum ways of imagining reality. In this first book, he shares the findings of that research in summary, amid new applied insights developed in relation to Khayyami studies. In the first chapter, Tamdgidi raises a set of eight questions about the structure of C. Wright Mills's Sociological Imagination as a potential framework for Khayyami studies. In the second chapter, he shows how the questions are symptomatic of Newtonian structures that

still continue to frame mills's sociological imagination in the third chapter the author explores how the sociological imagination can be reinvented to be more in tune with the findings of quantum science in the last chapter the implications of the quantum sociological imagination for devising a hermeneutic method for new khayyam and robaiyat studies are outlined in conclusion the findings of this first book of the omar khayyam's secret series are summarized contents about okcir i published to date in the series ii about this book iv about the author vi note on transliteration xv acknowledgments xvii preface to the series origins of this study 1 introduction to the series the enigmatic omar khayyam and the impasse of khayyami studies 9 chapter i the promise and the classical limits of c wright mills's sociological imagination 27 chapter ii the newtonian way of imagining reality society sociology and khayyami studies 61 chapter iii quantum sociological imagination as a framework for new khayyami studies 109 chapter iv hermeneutics of the khayyami robaiyat in quantum sociological imagination source availability and matters of secrecy 177 conclusion to book 1 summary of findings 215 appendix transliteration system and book 1 glossary 225 book 1 cumulative glossary of transliterations 238 book 1 references 243 book 1 index 251
